Systems Theory and Theology Markus Locker, 2011-01-01 The contributions to the collection explore the interplay between systems theory religion and theology and the symbolic expressions and philosophical foundations of these academic disciplines This endeavor is rooted in the oeuvre of the late Austrian physicist Alfred Locker 1922 2005 who firmly believed that systems theory would finally emerged some sixty years after Bertalanffy's seminal work on General System Theory as a bridge building metatheory between the sciences and religion The studies contained in this collection enter into a critical evaluation and reassessment of the dominant postulates of scientific and theological systems and their interaction including treatments of paradoxes A Locker the inner sciences Zwick systems of meaning Krieger philosophy Murphy theology Sedmak isomorphies of religious symbols Zwick and the bridging of science and religion A Locker Stranger Than Fiction Edwin Frank, 2024-11-19 One of the Washington Post s 50 Best Nonfiction Books of 2024 A New York Times Book Review Editors Choice Ambitious intelligent and happily unpretentious Louis Menand The New Yorker Convincing idiosyncratic and often felicitous Alexandra Jabobs The New York Times Book Review A legendary editor s reckoning with the twentieth century novel and the urgent messages it sends How can we live differently a young woman urgently demands in Virginia Woolf's novel The Years It is the 1930s war and death are in the air but her guestion was asked again and again in the course of a century where things changed fast and changed all the time The century brought world wars revolutions automobiles movies and the internet votes for women death camps The century brought questions Novelists in the twentieth century had a question of their own how can we write a novel as startling and unforeseen as the world we live in Again and again they did transforming the novel as the century remade the world Imagine the history of the twentieth century novel recounted with the urgency and intimacy of a novel That's what Edwin Frank the legendary editor who has run the New York Review Books publishing imprint since its inception does in Stranger than Fiction With penetrating insight and originality Frank introduces us to books some famous some little known from the whole course of the century and from around the world Starting with Dostoevsky's Notes from Underground of 1864 Frank shows how its twitchy self undermining and never satisfied narrator established a voice that would echo through the coming century He illuminates the political vision of H G Wells s science fiction Colette and Andre Gide s subversions of traditional gender roles and Gertrude Stein s untethering of the American sentence He describes the monumental ambition of books such as Mrs Dalloway The Magic Mountain and The Man Without Qualities to rebuild a world of human possibility upon the ruins of World War I and explores how Japan's Natsume S seki and Nigeria s Chinua Achebe broke open European models to reflect their own distinct histories and experience Here too are Vasily Grossman Anna Banti and Elsa Morante reckoning in specific ways with the traumas of World War II while later chapters range from Marguerite Yourcenar and V S Naipaul to Gabriel Garc a Marguez and W G Sebald The story as a whole

is one of fearless often reckless exploration as well as unfathomable desolation Throughout we discover the power of the novel to reinvent itself to find a way for itself to live differently Stranger than Fiction offers a new vision of the history and art of the novel and of a dark and dazzling time in whose light and shadow we still stand "All-Electric" Narratives Rachele Dini, 2021-10-07 Winner of the 2023 Emily Toth Award for Best Single Work in Women's Studies All Electric Narratives is the first in depth study of time saving electrical appliances in American literature It examines the literary depiction of refrigerators vacuum cleaners oven ranges washing machines dryers dishwashers toasters blenders standing and hand held mixers and microwave ovens between 1945 when the all electric home came to be associated with the nation s hard won victory and 2020 as contemporary writers consider the enduring material and spiritual effects of these objects in the 21st century The appropriation and subversion of the rhetoric of domestic electrification and time saving comprises a crucial but overlooked element in 20th century literary forms and genres including Beat literature Black American literature second wave feminist fiction science fiction and postmodernist fiction Through close readings of dozens of literary texts alongside print and television ads from this period Dini shows how U S writers have unearthed the paradoxes inherent to claims of appliances capacity to give back time to their user transport them into a technologically progressive future or return them to some pastoral past In so doing she reveals literary appliances role in raising questions about gender norms and sexuality racial exclusion and erasure class anxieties the ramifications of mechanization the perils and possibilities of conformity the limitations of patriotism and the inevitable fallacy of utopian thinking while both shaping and radically Play Among Books Miro Roman, Alice ch3n81,2021-12-06 How disrupting the literary forms in which they operated does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science The Architecture of Error Francesca Hughes, 2014-11-07 Why the rise of redundant precision in architecture and the accompanying fear of error are key to understanding the discipline s needs anxieties and desires When architects draw even brick walls to six decimal places with software designed to cut lenses it is clear that the logic that once organized relations between precision and material error in construction has unraveled Precision already a promiscuous term seems now to have been uncoupled from its contract with truthfulness Meanwhile error and the always political space of its dissent has reconfigured itself In The Architecture of Error Francesca Hughes argues that behind the architect's acute fetishization of redundant precision lies a special fear of physical error What if we were to consider the pivotal cultural and technological transformations of modernism to have been driven not so much by the causes its narratives declare she asks as

by an unspoken horror of loss of control over error material life and everything that matter stands for Hughes traces the rising intolerance of material vagaries from the removal of ornament to digitalized fabrication that produced the blind rejection of organic materials the proliferation of material testing and the rhetorical obstacles that blighted cybernetics Why is it she asks that the more we cornered physical error the more we feared it Hughes's analysis of redundant precision exposes an architecture of fear whose politics must be called into question Proposing error as a new category for architectural thought Hughes draws on other disciplines and practices that have interrogated precision and failure citing the work of scientists Nancy Cartwright and Evelyn Fox Keller and visual artists Gordon Matta Clark Barbara Hepworth Rachel Whiteread and others These non architect practitioners she argues show that error need not be excluded and precision can be made accountable The Use of Classical Spiritual Disciplines in Evangelical Devotional Life Daniel D. Green, 2008-03-01 This is a presentation of a research project on the effect of classical spiritual disciplines on the spiritual and psychological well being of participants Eighteen persons studied and practiced thirteen different spiritual disciplines over a period of sixth months Pretests and posttests measured the resultant change Foundational chapters survey the literature of the disciplines and discuss the potential benefits and dangers of the spiritual practices considered Substantial appendices contain the lessons presented on the disciplines themselves as well as the test instruments used to measure results A narrative relating the progress of the project from inception to completion is included **Encyclopedia of Life** Writing Margaretta Jolly, 2013-12-04 First published in 2001 Routledge is an imprint of Taylor Francis an informa company Publishers' circular and booksellers' record ,1861 The Publishers' Circular and General Record of British
