balance and quality for human life Porous Pavements Bruce Ferguson, 2005-02-18 Pavements are the most ubiquitous of all man made structures and they have an enormous impact on environmental quality They are responsible for hydrocarbon pollutants excess runoff groundwater decline and the resulting local water shortages temperature increases in the urban heat island and for the ability of trees to extend their roots in **Flood Prevention and Remediation** Flávio César Borba Mascarenhas, 2011 Human settlements have grown near watercourses since ancient times Water supply irrigation navigation wastewater conveyance and city defense are some of the uses that were responsible for this choice Even floods played an important role favoring the soil fertilization Man made actions however especially in urban watersheds significantly modify the natural water cycle increasing the magnitude of floods and their potential damages Consequently flood damages are one of the most important issues to be dealt with in the present days Several different studies show that floods are one of the most important natural hazards with several losses both in terms of lives and money Particularly in urban areas the amplification of floods may cause important economic losses and lead to critical social risks to the cities and their population when inundation reaches the built environment This situation is becoming more frequent each day Recent history shows that urbanization is an inevitable trend and today the most part of the world population lives in cities It is difficult however to adequately manage urban flood problems because flood risk and flood costs are not easy to quantify Traditionally flood risk and flood cost assessments face difficulties due to the subjective nature of these evaluations and to the inexistence of standardized methodologies This book tries to show different techniques and approaches to help in treating flood problems Chapters 1 and 2 show simplified mathematical modeling of floods and results of multifunctional landscape flood control measures in the city of Rio de Janeiro The remaining book chapters present remedial works against debris after floods in Venezuela and Measures for Mitigation of Flood areas in Japan There are also presented studies related with Flood Risk Assessment and Management in Mediterranean Basins The final chapter shows an interesting study related to the attitudes of residents in the Tokyo Bay area toward flood hazards **Stormwater Conveyance Modeling and Design** S. Rocky Durrans, Kristen Dietrich, Muneef Ahmad, Haestad Methods, Inc, 2003 CD ROM contains academic versions of StormCAD Stand Alone PondPack CulvertMaster and FlowMaster software **The Use of Best Management Practices (BMPs) in Urban Watersheds** Richard Field, Anthony N. Tafuri, 2006 Presents and compares all major stormwater runoff control strategies New data on pollutant removal efficiencies design costs environmental impacts and more Where and why to use the best techniques for limiting monitoring diffuse pollution Provides the tools to meet regulations and improve water quality in urban suburban watersheds From publisher's description *Urban Sustainability and River Restoration* Katia Perini, Paola Sabbion, 2017-02-06 Urban Sustainability and River Restoration Green and Blue Infrastructure considers the integration of green and blue infrastructure in cities as a strategy useful for acting on causes and effects of environmental and ecological issues River restoration projects are unique opportunities for sustainable development and smart growth of

communities providing multiple environmental economic and social benefits This book analyzes initiatives and actions carried out and developed to improve environmental conditions in cities and better understand the environmental impact of and in dense urban areas in the United States and in Europe **Advances in Modeling the Management of Stormwater Impacts** William James, 1997-01-01 The latest book in the popular series demonstrates state of the art methods models and techniques for water quality management This book includes a CD ROM that collects hundreds of hard to find literature citations from the gray literature **Dane County Erosion Control and Stormwater Management Manual** ,2007
