International Intellectual Property Law Paul Goldstein, Marketa Trimble, 2012-01-01 **International Copyright**

Paul Goldstein, P. Bernt Hugenholtz, 2012-11-15 International Copyright Principles Law and Practice surveys and analyzes the legal doctrines affecting copyright practice around the world in both transactional and litigation settings. It provides a step by step methodology for advising clients involved in exploiting creative works in or from foreign countries. Written by two of the most esteemed experts of copyright law in the United States and Europe, this volume is a unique synthesis of copyright law and practice taking into account the Berne Convention, the TRIPs Agreement, the ongoing harmonization of copyright in the European Union, and the impact of the Internet. National copyright rules on protectible subject matter, ownership, term, and rights are covered in detail and compared from country to country, as are topics on moral rights and neighboring rights. Separate sections cover such important topics as territoriality, national treatment, and choice of law, as well as the treaty and trade arrangements that underlie substantive copyright norms. International Copyright is an indispensable reference work for professionals involved with international copyright transactions or litigation and is essential reading for copyright scholars.

Intellectual Property in Asia Paul Goldstein, Joseph Straus, 2009-01-07 Introduction Intellectual property rights foster innovation. But if as it surely does, intellectual property means not just intellectual property rules, the law of patents, copyrights, trademarks, designs, trade secrets, and unfair competition, but also intellectual property institutions, the courts, police, regulatory agencies, and collecting societies that administer these rules, what are the respective roles of intellectual property rules and institutions in fostering creativity? And to what extent do forces outside intellectual property rules and institutions—economics, culture, politics, history—also contribute to innovation? Is it possible that these other factors so overwhelm the impact of intellectual property regimes that it is futile to expect adjustments in intellectual property rules and institutions to alter patterns of innovation and ultimately economic development? It was to address these questions in the most dynamic region of the world today, Asia, that we invited leading country experts to contribute studies that not only summarize the current condition of intellectual property regimes in countries ranging in economic size from Cambodia to Japan and in population from Laos to China, but that also describe the historical sources of these laws and institutions, the realities of intellectual property enforcement in the marketplace, and the political, economic, educational, and scientific infrastructures that sustain and direct investment in innovative activity.
