research paper

Introduction

The purpose of this pack is to introduce the reader to the main features of the research process. The type of information which informs decisions about how to undertake a research project is described and supported by examples from primary care and other health services research. The pack is intended for health care professionals with little or no previous research knowledge.

If a project is worth doing then it is probably worth convincing an interested organisation to fund it. There are no guaranteed ways of securing funding but there are steps you can take to maximise your chances of success. Applying for research funding might sound like the starting point of the research process but applicants need to demonstrate a clear idea of the entire process of a research project, right up until what will happen at the end of the process (for example modes of dissemination and practical implementation of results), in order to convince a funding body that their money will be spent wisely.

The pack is split into two sections. The first section 'Getting Started', takes the reader through a whistle stop tour of the research process and provides advice on how to get beyond a vague research idea to something that (with expert help, hard work and lots of enthusiasm) has the potential to generate new insights into health care issues and concerns. The second section, 'Getting Funded', looks at the context of research funding in the UK and encourages the reader to put their own research ideas to the acid test of a funding application.

As many of the terms used may be either new or used in a context unfamiliar to readers, a glossary of terms is provided at the back of the pack. We have tried to make the exercises of practical use to the reader. Some of the exercises test the reader's understanding of the concepts contained within the pack, while others give the reader the opportunity to work with their research ideas about their own areas of interest.

The other resource packs in this series provide more detail on specific aspects of the research process. The reader is pointed to specific resource packs at various points within this pack. The full list of packs produced by The NIHR RDS EM / YH can be found at:
