This extract focuses on the reasons for Lenin's New Economic Policy.

In March 1921 Lenin announced the end of War Communism and the inauguration of a New Economic Policy. The NEP was based on the following:

Requisitions from peasants were ended and a fixed tax in kind (grain) was substituted – which by 1924 had become a money tax. Once this tax was paid, the peasant was free to do what he liked with what remained. He could use it himself, sell it to the state or sell it on the open market which was now made legal. Private enterprise was allowed in trade and small-scale industry. Compulsory labour ceased; labour armies were stopped; bonuses were introduced for extra work. The currency was back on a sound footing and a regular system of taxation was introduced. Large-scale industry (coal, iron, steel, oil, electricity, railways) remained state-owned.

**1.3 Refer to Source C.**

1.3.1 Explain in your own words how Lenin's New Economic Policy was implemented.

(3)

The New Economic Policy was a drastic adaptation to the war communist policy, which allowed for a free market, private trade and enterprise. Private trade was no longer illegal, or government centralised. People paid a portion of their goods or income in the form of tax and were permitted to sell the rest on the open market. This stimulated the economy and encouraged economic growth.

1.3.2 In what ways was the New Economic Policy different to Lenin's ideal of a communist state? Support your answer with evidence from the source.

(3)

A communist state is one in which all individuals are equal. Under the NEP certain individuals profited more than others, which is a distinctly capitalist feature. This automatically created a sense of inequality and reduced the government's power and influence.

1.3.3 What was Lenin's intention for the state in creating the New Economic Policy?

(2)

It was Lenin's intention to recover the economy and to suppress peasant unrest, while still providing for the needs of the government.

## **Grade11 History Paper 1 Of 2014:**

*Narrating the Soviet Era in Russian School History Textbooks* Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period 1917-1991. Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin. This study combines research into these texts and inquiry into those who write, publish, approve or criticize them. Bringing together these perspectives provides a more complex view of school textbooks as final products of both top-down and bottom-up processes. This volume is aimed at postgraduate researchers and academics specializing in Soviet history, contemporary Russian politics and society, and history education and textbooks.

*The Schenley Experiment* Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly even improbably successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916, Schenley High School was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to de facto segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

Sherwin, Danielle Celermajer, 2021-03-11 The period since the First World War has been a century distinguished by the loss of any unitary foundation for truth ethics and the legitimate authority of law With the emergence of radical pluralism law has become the site of extraordinary creativity and on occasion a source of rights for those historically excluded from its protection A Cultural History of Law in the Modern Age tells stories of human struggles in the face of state authority including Aboriginal land claims popular resistance to corporate power and the inter generational ramifications of genocidal state violence The essays address how and with what effects different expressive modes ceremonial dance live street theater the acoustics of radio the affective range of film to name a few help to construct memorialize and disseminate political and legal meaning Drawing upon a wealth of visual textual and sound sources A Cultural History of Law in the Modern Age presents essays that examine key cultural case studies of the period on the themes of justice constitution codes agreements arguments property and possession wrongs and the legal profession Burnt by Democracy Jacqueline Kennelly, 2023-11-30 Burnt by Democracy traces the political ascendance of neoliberalism and its effects on youth The book

explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies Canada Australia New Zealand the United States and the United Kingdom Highlighting significant cuts to social and affordable housing astronomical increases in the costs of higher education and the transformation and erosion of state benefits systems Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties Rather it is because of collective misunderstanding about how democracy is actually structured how individuals learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality *Burnt by Democracy* makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all
