Fiscal Year 2013: Budget of the U.S. Government United States Government Office of Management and Budget, 2012-02-13 Contains the Budget Message of the President information on the President's priorities and budget overviews by agency and summary tables *Fiscal Year 2013: Budget of the U.S. Government* Office of Management and Budget (U S), 2012-02-13 Contains the Budget Message of the President information on the President's priorities and budget overviews by agency and summary tables The Budget of the United States Government United States. Office of Management and Budget, 2010 Calling the Shots Daniel P. Gitterman, 2017-02-14 Modern presidents are CEOs with broad powers over the federal government The United States Constitution lays out three hypothetically equal branches of government the executive the legislative and the judicial but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative force at the federal level In fact Daniel Gitterman tells us the president is effectively the CEO of an enormous federal bureaucracy Using the unique legal authority delegated by thousands of laws the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules the president calls the shots as to how the government is run on a daily basis Modern presidents have for example used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers Presidents and their staffs use specific tools including executive orders and memoranda to agency heads as instruments of control and influence over the government and the private sector For more than a century they have used these tools without violating the separation of powers Calling the Shots demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president's political and policymaking arsenal Rough Draft Amy J. Rutenberg, 2019-09-15 Rough Draft draws the curtain on the race and class inequities of the Selective Service during the Vietnam War Amy J Rutenberg argues that policy makers idealized conceptions of Cold War middle class masculinity directly affected whom they targeted for conscription and also for deferment Federal officials believed that college educated men could protect the nation from the threat of communism more effectively as civilians than as soldiers The availability of deferments for this group mushroomed between 1945 and 1965 making it less and less likely that middle class white men would serve in the Cold War army Meanwhile officials used the War on Poverty to target poorer and racialized men for conscription in the hopes that military service would offer them skills they could use in civilian life As Rutenberg shows manpower policies between World War II and the Vietnam War had unintended consequences While some men resisted military service in Vietnam for reasons of political conscience most did so because manpower policies made it possible By shielding middle class breadwinners in the name of national security policymakers militarized certain civilian roles a move that ironically separated military service from the obligations of masculine citizenship and ultimately helped kill the draft in the United States **The Making of Twenty-First-Century Richmond**

Thad Williamson, Julian M. Hayter, Amy L. Howard, 2024-12-02 Richmond Virginia took center stage globally in the summer of 2020 as an epicenter of antiracist protests in the wake of the police murder of George Floyd. In a period of just a few weeks, overwhelming public support grew for removing Richmond's Confederate monuments. Activists then transformed the remaining statue of Robert E. Lee into a shrine to African American resolve to the Black Lives Matter movement and to Black victims of police brutality. Coming to terms with Richmond's tortured racial history, however, is much more difficult than toppling symbols of white supremacy. This book explores these dynamics via a multidisciplinary framework of historical research, public policy analysis, and political analysis, showing the inner dynamics of politics and governance in Richmond. The authors reveal why change and progress has often been so difficult to achieve and why that matters, with a focus on three fundamental policy areas: education, economic development, and housing. The result is a comprehensive assessment of urban governance in a major southern city in the early twenty-first century, as well as an accounting of the policy and human consequences of both its limited successes and its recurring failures. *United States Army in World War II*, 2013

Fiscal Year 2013 Appendix, Budget of the U.S. Government, Presents detailed information on individual programs and appropriation accounts that constitute the budget. Includes for each Government department and agency the text of proposed appropriations, language budget schedules for each account, new legislative proposals, and explanations of the work to be performed and the funds needed, and proposed general provisions applicable to the appropriations of entire agencies or groups of agencies. NOTE: NO FURTHER DISCOUNTS FOR ALREADY REDUCED SALE ITEMS. *Global Corruption Report: Education* Transparency International, 2013-10-08 Corruption and poor governance are acknowledged as major impediments to realizing the right to education and to reaching the Millennium Development Goal of universal primary education by 2015. Corruption not only distorts access to education but affects the quality of education and the reliability of research findings. From corruption in the procurement of school resources and nepotism in the hiring of teachers to the buying and selling of academic titles and the skewing of research results, major corruption risks can be identified at every level of the education and research systems. Conversely, education serves as a means to strengthen personal integrity and is a critical tool to address corruption effectively. The Global Corruption Report (GCR) is Transparency International's flagship publication, bringing the expertise of the anti-corruption movement to bear on a specific corruption issue or sector. The Global Corruption Report on education consists of more than 70 articles commissioned from experts in the fields of corruption and education from universities, think tanks, business, civil society, and international organizations. The Global Corruption Report on education and academic research will provide essential analysis for understanding the corruption risks in the sector and highlight the significant work that has already been done in the field to improve governance and educational outcomes. This will be an opportunity to pull together cutting-edge knowledge on lessons learnt, innovative tools, and solutions that exist in order to fight corruption in the education sector. The Social Studies Curriculum, Fifth Edition E. Wayne Ross, 2024-09-01

The Social Studies Curriculum Fifth Edition updates the definitive overview of the issues teachers face when creating learning experiences for students in social studies. Renowned for connecting diverse elements of the social studies curriculum from history to cultural studies to contemporary social issues, the book offers a unique and critical perspective that continues to separate it from other texts. The social studies curriculum is contested terrain both epistemologically and politically. Completely updated and revised, the fifth edition includes fourteen new chapters and covers the politics of the social studies curriculum, questions of historical perspective, Black education and critical race theory, whiteness and anti-racism, decolonial literacy and decolonizing the curriculum, gender and sexuality, Islamophobia, critical media literacy, evil in social studies, economics education, anarchism, children's rights and Earth democracy and citizenship education. Readers are encouraged to reconsider their assumptions and understandings of the purposes, nature and possibilities of the social studies curriculum.

Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20. The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications, notably in the development of chemical weapons. Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict, which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons, whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons. Stark indications of the multi-faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK. Using a multi-disciplinary approach and drawing upon an international group of experts, this book analyses current and likely near future advances in relevant science and technology, assessing the risks of their misuse. The book examines the current capabilities, limitations and failures of the existing international arms control and disarmament architecture, notably the Chemical Weapons Convention, in preventing the development and use of chemical weapons. Through the employment of a novel Holistic Arms Control methodology, the authors also look beyond the bounds of such treaties to explore the full range of international law, international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents, in order to develop recommendations for more effective routes to combat their proliferation and misuse. A particular emphasis is given to the roles that chemical and life scientists, health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all.

The State of the System Paul W. Bennett, 2020-09-23. Over the last fifty years, Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage. Crying out for democratic school level reform, the system is now a centralized bureaucratic fortress that every year becomes softer on

standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions *The State of the System* explains how public schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and ills present in the system Paul Bennett proposes a bold plan to re engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada *The State of the System* issues a clarion call for more responsive engaged and accountable public schools

What Went Wrong George R. Tyler, 2013-07-16 Something has gone seriously wrong with the American economy The American economy has experienced considerable growth in the last 30 years But virtually none of this growth has trickled down to the average American Incomes have been flat since 1985 Inequality has grown and social mobility has dropped dramatically Equally troubling these policies have been devastating to both American productivity and our long term competitiveness Many reasons for these failures have been proposed Globalization Union greed Outsourcing But none of these explanations can address the harsh truth that many countries around the world are dramatically outperforming the U S in delivering broad middle class prosperity And this is despite the fact that these countries are more exposed than America to outsourcing and globalization and have much higher levels of union membership In *What Went Wrong* George R Tyler a veteran of the World Bank and the Treasury Department takes the reader through an objective and data rich examination of the American experience over the last 30 years He provides a fascinating comparison between the America and the experience of the family capitalism countries Australia Austria Belgium Denmark France Germany the Netherlands and Sweden Over the last 30 years they have outperformed the U S economy by the only metric that really matters delivering better lives for their citizens The policies adopted by the family capitalist countries aren't socialist or foreign They are the same policies that made the U S economy of the 1950s and 1960s the strongest in the world *What Went Wrong* describes exactly what went wrong with the American economy how countries around the world have avoided these problems and what we need to do to get back on the right track

After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers *After the Education Wars* helps us to see a better way forward Cathy N Davidson The New York Times Book Review *After the Education Wars* is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take

on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools

United States Code United States,2018 **Adaptive Thermal Comfort: Foundations and Analysis** Michael Humphreys,Fergus Nicol,Susan Roaf,2015-08-27 There has been widespread dissatisfaction with accepted models for predicting the conditions that people will find thermally comfortable in buildings These models require knowledge about clothing and activity but can give little guidance on how to quantify them in any future situation This has forced designers to make assumptions about people s future behaviour based on very little information and as a result encouraged static design indoor temperatures This book is the second in a three volume set covering all aspects of Adaptive Thermal Comfort The first part narrates the development of the adaptive approach to thermal comfort from its early beginnings in the 1960s It discusses recent work in the field and suggests ways in which it can be developed and modelled Such models can be used to set dynamic interactive standards for thermal comfort which will help overcome the problems inherited from the past The second part of the volume engages with the practical and theoretical problems encountered in field studies and in their statistical analysis providing guidance towards their resolution so that valid conclusions may be drawn from such studies

Local Content and Sustainable Development in Global Energy Markets Damilola S. Olawuyi,2021-03-04 Examines critical links between local content requirements and the application of sustainable development treaties in global energy markets **Public Health Practice in Australia** Vivian Lin,James Smith,Sally Fawkes,2020-07-16 Public Health Practice in Australia offers a thorough introduction to what public health practitioners do and the effort involved in improving the health of the public This second edition has been fully revised and updated in line with current policies and practice It highlights common threads that underlie seemingly disparate activities ideas and entities that comprise the organised effort of public health practice The emphasis is on securing and maintaining the conditions in society that enable people to live healthy and fulfilling lives The authors examine the impact of historical social economic

environmental and political factors on the health of individuals communities and populations Taking an applied multidisciplinary approach they outline the strategies and tools that public health practitioners use to improve health outcomes identifying infrastructure needs in the workforce public and private sector organisations and in regulation gathering analysing and using health data applying interventions in health policy provision of health services and health promotion Public Health Practice in Australia draws on current international and Australian research and the interwoven case studies make the theories and concepts come alive It is a valuable resource for students and professionals across the health sciences including public health medicine environmental health health promotion health information management and health administration The book is impressive in the completeness clarity and consistency of the material covered and for the way in which many of the theoretical issues are related to current practice An extremely useful and valuable reference for both students and practitioners alike Thomas Tenkate Environmental Health **The Meritocracy Trap** Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people Government Reports Announcements & Index ,1983-04
