Stresses of Cucurbits: Current Status and Management Bholanath Mondal, Chandan Kumar Mondal, Palash Mondal, 2020-11-16 With advances in agro technology cucurbits are now being grown throughout the year. However they are prone to biotic and abiotic stresses resulting in significant yield loss. Sustainable management of such stresses is a complex issue in the intensive cultivation of cucurbits involving high levels of fertilization and irrigation. Further under the changing climatic conditions pest scenarios vary constantly with invasive alien species of pests becoming more common as a result of free trade and frequent international travel. As such agrochemicals are being used as powerful weapons to combat the increasing number of pests and diseases. Lack of proper crop management technologies inaccurate diagnosis and indiscriminate and excessive use of pesticides are major causes of pesticide resistance and resurgence environmental pollution and hazards to the non target biota. This comprehensive book provides essential insights into the management of biotic and abiotic stresses in cucurbit cultivation and re evaluating the role of agrochemicals and gathers information on insect pests mites nematodes diseases and weeds as well as on their sustainable management from scattered sources. Written in language that is easy to understand and including high quality photographs it is a valuable resource for students researchers plant protection specialists extension workers and growers.
