**The TLS Continuum Field Guide** Daniel Bloom, 2024-02-28 This book provides a roadmap for implementing a powerful technique will reduce waste and accelerate flow within a process The TLS Continuum methodology The letters TLS stand for the three components of the continuum The letter T stands for the Theory of Constraints Created by Dr Eliyahu Goldratt in his book The Goal it is a critically thinking based system for determining where the obstacles lie within your organization Through the use of various tools it asks you to determine where the obstacles are in the process The purpose of the Theory of Constraints TOC involvement in the continuum is to determine what needs to be changed how to change it and how to accomplish the change TOC operates at the level of the chain looking for the weakest link It is in essence the hypothesis of the problem solving method overall The letter L stands for Lean Most organizations are familiar with the concept of Lean It is centered around removing waste from the organizational processes so that the customer receives their orders faster Understand that faster may not mean cheaper or better quality it means only that we expedite the process The final letter is S and it represents the concepts of Six Sigma The primary goal here is remove variation from the processes If we combine the three letters of the acronym what we find that the TLS continuum is organized around a process in itself We use the Theory of Constraints to locate and identify the obstacles within the system What is holding up the process Where is the weakest link in the process With the introduction of TOC the system asks you to elevate the obstacles and determine how to remove them We use Lean to do what it is meant to do and that is to remove the obstacles We have identified the obstacle and determined through the critical thinking tools how to remove that obstacle and then use the Lean tools to actually remove the waste Finally the system utilizes the Six Sigma tools to create the standard of work and remove any variation from the process When we do this we have completed the improvement process by creating a progressive system for resolving the problems that occur within many organizations It is an evidence based effort to identify remove and improve

the system so the problem does not recur

**Empowerment** Daniel Bloom,2020-06-09 One of the major discussions in the business world is How do we get our human capital assets more engaged in the organization Current Gallup Polls state that 85% of our employees are not engaged within their organizations Employee Empowerment fully analyzes this workplace condition which is a major concern for most CEOs The solution proposed by this book is the introduction of the TLS Theory of Constraints Lean Six Sigma Continuum Empowerment model which comprises three levels of empowerment Management Cross Functional Team and Individual The first is the empowerment that comes from upper management to the organization as a whole The second level is the empowerment that comes from the various cross functional teams and the final level is from the individuals themselves through their ability to take ownership in the processes in which they are involved The end solution in the book is that if we can get the human capital assets to take ownership of the processes that is empower the front line employees it will increase the level of engagement If they become more engaged they will empower the organization at all levels to introduce sustainable change management to resolve problems within the organization One of the tools of individual empowerment is the use of the Six Sigma toolbox This book makes the case that when human capital assets take ownership of the processes then we have greater engagement and thus a more empowered organization *Project Management* Harold
