Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e.g. Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries

DR. S.M. EJAZ AHMAD, 2024-12-17 Human resource development policies place a strong emphasis on training and skill improvement The scale of India's present technical training infrastructure is less than what is needed There is also a sizable skill gap between what the market requires in terms of skills and what graduate and diploma programs have to offer Not only is it difficult to establish a significant quantitative expansion of skill training facilities but it's also difficult to improve their quality which is a work that is just as significant The institutional level's capacity for educational and training programs is insufficient to meet the rising demand for the necessary skill sets knowledge and experience Apprenticeships have great promise in fostering our youths starting at the school level especially with several industries experiencing significant skills deficits in the future The

National Apprenticeship Training Scheme NATS in India which promotes learning by earning and learning by doing is a potent tool for skill development. Important changes have been made to The Apprentices Act 1961 to help freshly graduated students who are joining the workforce receive industrial training and exposure to contemporary industrial procedures. The BOAT Boards of Apprenticeship Training situated in Mumbai, Kanpur, Chennai, and the BOPT Board of Practical Training headquartered in Kolkata are the four independent regional organizations through which the Ministry of Education MoE implements the program. Despite its significance and the crucial role that skill development plays in the economy, it has been discovered that the topic has not recently been investigated. Therefore, it was crucial to investigate the facts of the apprentices' job and training experiences and the business community's opinions regarding NATS and the subject matter of such a scheme. Additionally, it will assist policymakers, academicians, and industrialists in comprehending the gaps and choosing their future course of action.

**The Success of Apprenticeships** Jean-Luc Cerdin, Jean-Marie Peretti, 2020-02-05. Apprenticeships can offer apprentices, their teacher-tutors, and business apprenticeship supervisors experiences that are rich in knowledge. The Success of Apprenticeships presents the observations and opinions of 48 actors regarding apprenticeships. These testimonies recount how apprenticeships allowed them to improve their expertise, their professional practices, and their organization skills. This book also examines how their interactions in the work study process allowed them not only to develop the skills of apprentices but also the skills of those who accompanied them: the teacher-tutors and the business apprenticeship supervisors. The creation of an authentic community of apprentices subscribes to the formation of an ecosystem of learning in which each individual harvests fruits in terms of the development of their personal abilities.

Apprentice Nation Ryan Craig, 2023-11-07 College isn't for everyone. It's time to challenge the status quo and embrace the potential of apprenticeships in tech, healthcare, finance, and more, which can provide a sustainable pathway to economic opportunity. For decades, college has been the only respectable way to access the world of work, despite paralyzing tuition and a dire lack of practical skills that has left 40 percent of college graduates underemployed, unfulfilled, and struggling to repay student loan debt. Education and workforce expert Ryan Craig explores how a modern apprenticeship system will allow students and job seekers to jump-start their careers by learning while they earn, ultimately leading to greater workforce diversity and geographic mobility. With a deep dive into the history behind America's outdated college system, Craig reveals the origins of the student debt crises and admissions scandals. Why apprenticeships are an effective pathway to career opportunity. What America can do to catch up with other nations making apprenticeship opportunities broadly available. Where students and job seekers can go to land an apprenticeship. Featuring a directory of U.S. apprenticeship programs by industry and location, *Apprentice Nation* is an accessible blueprint for a country where young Americans of all backgrounds can launch careers in a variety of in-demand fields. With just a few common-sense changes to education and workforce development, an *Apprentice Nation* will put the American Dream within reach for everyone.
