Officer Patricia Stewart has been an accomplished member of the Wharton County Police force for the past twelve years. As a native to the Wharton County area, she was inspired from a young age to join in the force that served not only as the protective force of the community, but also helped the community through teamwork and service. Since she has been on the force, she has helped to bring forth much change in the community through her outreach work and her efforts to help older students understand the true mission of a police force. Through leadership and dedication, she continues to serve the entire Wharton County area.

Patricia graduated from Gardener High School with a certificate of completion in the Reserve Officer's Training Corps program at the school. She was the lead cadet in the ROTC program, and was awarded the Cadet Honor for completing over 1000 hours of community service throughout her time in the program. After graduating, she attended the police academy at Detrick Falls, where she completed all the necessary training and tests to become a police officer and investigator. She then chose to return to her home of Wharton County in order to continue serving the community that she had grown up in.

During her tenure as part of the Wharton County Police force, Patricia has participated in over 140 investigations, and has played an active role in gathering the evidence for several key cases. She has received the Award for Integrity for her handling of different volatile situations with the right amount of poise and authority to resolve issues without violence. Her contributions to the community through educational programs have also made a positive impact on the lives of many children throughout the county. She hopes to continue being able to serve the community through diligence and trustworthiness.

Subcommittee on Homeland Security,2007 Protecting Personal Information Andrea Monti,Raymond Wacks,2019-05-30 The concept of privacy has long been confused and incoherent The right to privacy has been applied promiscuously to an alarmingly wide ranging assortment of issues including free speech political consent abortion contraception sexual preference noise discrimination and pornography The conventional definition of privacy and attempts to evolve a privacy as a fence approach are unable to deal effectively with the technological advances that have significantly altered the way information is collected stored and communicated Social media such as Facebook pose searching questions about the use and protection of personal information and reveal the limits of conceiving the right to privacy as synonymous with data protection The recent European Union s GDPR seeks to enforce greater protection of personal information but the overlap with privacy has further obscured its core meaning This book traces these troubling developments and seeks to reveal the essential nature of privacy and critically what privacy is not
