Spectral Analysis of Differential Operators Fedor S. Rofe-Beketov, Aleksandr M. Khol'kin, Ognjen Milatovic, 2005 This is the first monograph devoted to the Sturm oscillatory theory for infinite systems of differential equations and its relations with the spectral theory It aims to study a theory of self adjoint problems for such systems based on an elegant method of binary relations Another topic investigated in the book is the behavior of discrete eigenvalues which appear in spectral gaps of the Hill operator and almost periodic Schrödinger operators due to local perturbations of the potential e.g. modeling impurities in crystals The book is based on results that have not been presented in other monographs The only prerequisites needed to read it are basics of ordinary differential equations and operator theory It should be accessible to graduate students though its main topics are of interest to research mathematicians working in functional analysis differential equations and mathematical physics as well as to physicists interested in spectral theory of differential operators

Transnational Film Remakes Iain Robert Smith, 2017-03-08 What happens when a film is remade in another national context How do notions of translation adaptation and localisation help us understand the cultural dynamics of these shifts and in what ways does a transnational perspective offer us a deeper understanding of film remaking Bringing together a range of international scholars Transnational Film Remakes is the first edited collection to specifically focus on the phenomenon of cross cultural remakes Using a variety of case studies from Hong Kong remakes of Japanese cinema to

Bollywood remakes of Australian television this book provides an analysis of cinematic remaking that moves beyond Hollywood to address the truly global nature of this phenomenon Looking at iconic contemporary titles such as *The Girl with the Dragon Tattoo* and *Oldboy* as well as classics like *La Bete Humaine* and *La Chienne* this book interrogates the fluid and dynamic ways in which texts are adapted and reworked across national borders to provide a distinctive new model for understanding these global cultural borrowings

Safety Theater Sidney Dekker, 2025-06-23 How is it possible that the desire for a perfectly safe world with perfectly safe workplaces helps generate the opposite Safety Theater shows how our desire for perfection drives compliance clutter inauthentic relationships with work as done and new kinds of accidents Written by the leading global voice on safety innovation today Safety Theater takes us back to the Enlightenment and its aspiration toward a perfectible world through rationality and science and explains how by separating severity from injury rates two centuries later we now hit our targets but miss the point This hopeful forward looking book is the final volume in a three part series on the effects of neoliberalism which promotes the role of the private sector in the economy Showcasing a more caring kind of capitalism where free markets are free in a frame where horizontal coordination replaces hierarchical control where shareholders are not the only stakeholders and where value and prosperity are assessed in terms other than merely economic ones the book platforms much of what is now known as safety differently and also allows us to think differently about our capacity to manage complexity including its possible drift toward failure and see our fellow human beings as resources for solutions not as problems to control Safety Theater introduces the socio economic success and value system that distinguish Rhineland economies from Anglo ones It explains how complexity can never be governed through hierarchy and compliance but necessarily requires trust and horizontal coordination offers a vision of humanity richer than Anglo style capitalism can offer and examines how Rhineland thinking values tripartite consultation between workers employers and government in ways that can help stem the worst effects of free market policymaking on the compliance clutter and drift into failure as detailed in the previous two volumes in this trilogy Sidney Dekker's work from his debut *Field Guide to Understanding Human Error* in 2001 to his recent *Random Noise* always challenges readers to embrace more humane empowering ways to think about work and its quality and safety In *Safety Theater* Dekker extends his reach once again writing for all managers board members organization leaders consultants practitioners researchers lecturers students and investigators curious to understand the genuine nature of organizational and safety performance

Johann Sebastian Bach's Christmas Oratorio Markus Rathey, 2016 In the last decades of the 17th century the feast of Christmas in Lutheran Germany underwent a major transformation when theologians and local governments waged an early modern war on Christmas discouraging riotous pageants and carnivalesque rituals in favor of more personal and internalized

expressions of piety Christmas rituals such as the Heilig Christ plays and the rocking of the child Kindelwiegen were abolished and Christian devotion focused increasingly on the metaphor of a birth of Christ in the human heart John Sebastian Bach's Christmas Oratorio composed in 1734 both reflects this new piety and conveys the composer's experience living through this tumult during his own childhood and early career Markus Rathey's book is the first thorough study of this popular masterpiece in English While giving a comprehensive overview of the Christmas Oratorio as a whole the book focuses on two themes in particular the cultural and theological understanding of Christmas in Bach's time and the compositional process that led Bach from the earliest concepts to the completed piece The cultural and religious context of the oratorio provides the backdrop for Rathey's detailed analysis of the composition in which he explores Bach's compositional practices for example his reuse and parodies of movements that had originally been composed for secular cantatas The book analyzes Bach's original score and sheds new light on the way Bach wrote the piece how he shaped musical themes and how he revised his initial ideas into the final composition
