May,2014-01-09 EPD Congress is an annual collection of conference proceedings that addresses extraction and processing metallurgy The papers in this book are drawn from symposia held at the 2014 Annual Meeting of The Minerals Metals Materials Society The 2014 edition includes papers from the following four symposia Fluidization Technologies for the Mineral Materials and Energy Industries General Recycling Materials Processing Fundamentals Recycling and Sustainability Update **Handbook of Electronic Waste Management** Majeti Narasimha Var Prasad,Meththika Vithanage,Anwasha Borthakur,2019-11-21 Handbook of Electronic Waste Management International Best Practices and Case Studies begin with a brief summary of the environmental challenges associated with the approaches used in international e waste handling The book's authors offer a detailed presentation of e waste handling methods that also includes examples to further demonstrate how they work in the real world This is followed by data that reveals the geographies of e waste flows at global national and subnational levels Users will find this resource to be a detailed presentation of e waste estimation methods that also addresses both the handling of e waste and their hazardous effect on the surrounding environment Includes case studies to illustrate the implementation of innovative e waste treatment technologies Provides methods for designing and managing e waste management networks in accordance with regulations fulfilment obligations and process efficiency Reference guide for adapting traditional waste management methods and handling practices to the handling and storage of electronic waste until disposal Provides e waste handling solutions for both urban and rural perspectives **Popular Science** ,1987-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Customization 4.0** Stephan Hankammer,Kjeld Nielsen,Frank T. Piller,Günther Schuh,Ning Wang,2018-06-20 This proceedings volume presents the latest research from the worldwide mass customization personalization MCP community bringing together new thoughts and results from various disciplines within the field The chapters are based on papers from the MCPC 2017 The book showcases research and practice from authors that see MCP as an opportunity to extend or even revolutionize current business models

The current trends of Industrie 4.0 digital manufacturing and the rise of smart products allow for a fresh perspective on MCP Customization 4.0. The book places a new set of values in the centre of the debate: a world with finite resources, global population growth and exacerbating climate change needs smart thinking to engage the most effective capabilities and resources. It discusses how Customization 4.0 fosters sustainable development and creates shared value for companies, customers, consumers and the society as a whole. The chapters of this book are contributed by a wide range of specialists offering cutting edge research as well as insightful advances in industrial practice in key areas. The MCPC 2017 has a strong focus on real life MCP applications and this proceedings volume reflects this. MCP strategies aim to profit from the fact that people are different. Their objective is to turn customer heterogeneities into opportunities, hence addressing long tail business models. The objective of MCP is to provide goods and services that best serve individual customers' needs with near mass production efficiency. This proceedings volume highlights the interdisciplinary work of thought leaders, technology developers and researchers with corporate entrepreneurs putting these strategies into practice. Chapter 24 is open access under a CC BY 4.0 license via link.springer.com. [The Economics of Waste Management in East Asia](#) Masashi Yamamoto, Eiji Hosoda, 2016-04-14. The existing literature provides very little information on the real and current process of waste disposal and recycling in China. China generates large amount of waste and it covers about 20 % of the world waste trade. This book focuses on China's waste management and recycling policy. The book also examines the relationship between China's waste management and recycling industry and its legal structure. It fills in the gap by providing insight into topics on how to resolve China's waste management and recycling problems, theories and empirical studies on waste and management as well as waste management policies in East Asia. It also includes comparative analysis through case studies on other Asian countries such as Thailand and Japan.
