Le Transport Collectif De Marchandises:

Vers la voiture automate Georges Dobias, 2003-05-23 Demain comme aujourd'hui nous vivons dans la civilisation de l'automobile. Mais tout autrement. La voiture sera intelligente et la route la circulation automatisée. C'est cette révolution majeure laquelle travaillent les ingénieurs que nous raconte ici Georges Dobias. Capteurs qui régulent les feux tricolores, instructions en temps réel sur les itinéraires, voies spécifiques selon le véhicule ou la direction de nos villes ont changé. Mais les mutations venir porteront sur le conducteur. Il sera guidé par des automatismes qui encadreront ses longs parcours, l'empêcheront de sortir de route, l'alerteront en cas d'assoupissement, lui imposeront distances et vitesses. Ces nouveaux chemins de la sécurité seront aussi ceux de la liberté offrant enfin une nouvelle manière de circuler ensemble, les uns avec les autres.

Georges Dobias, ingénieur général des Ponts et Chaussées, a longtemps dirigé l'Institut national de recherche sur les transports et leur sécurité, puis le Syndicat des transports de la France.

Les transports durables Bernard Favre, 2014-02-01 Le transport des personnes et des marchandises dont le taux de croissance mondiale est spectaculaire contribue environ 25 % des émissions mondiales de gaz à effet de serre. Les objectifs de développement durable que sont la réduction des émissions gazeuses et sonores, la consommation énergétique, la congestion, la limitation de l'occupation foncière et l'amélioration de la mobilité sont loin d'être satisfaits. Cet ouvrage approfondit les différents aspects du transport durable par une approche systémique. Il analyse les solutions technologiques et organisationnelles ainsi que les obstacles surmonter pour les mettre en œuvre. Partant des fondamentaux du transport, il traite de leurs prolongements dans les domaines de l'énergie, des matériaux, de l'intelligence et dans l'organisation de la mobilité et de la logistique. Les transports durables dresse un panorama des innovations issues du travail collaboratif entre les acteurs industriels et gestionnaires du transport usagers ou autorités publiques.
