Teaching Leaders to Lead Teachers Saran Donahoo,Richard C Hunter,2007-08-20 TEACHING LEADERS TO LEAD TEACHERS EDUCATIONAL ADMINISTRATION IN THE ERA OF CONSTANT CRISIS In the 21st century the perceived crisis in how schools educate students significantly influences the decision of teachers to move into administrative positions as well as their ability to succeed once they take on these positions Influenced by the media the community and the teacher s lounge many good educators are increasingly unwilling or simply unprepared to make the jump into school leadership and management This book addresses some of the issues that affect school leadership by providing insights into the current state of educational administration in the hope of demystifying or dismissing some of the popular assumptions regarding what really takes place in the administration office In doing so this text examines topics related to the preparation and training of prospective

administrators factors that affect the process of leading in learning environments and perspectives on the state and structure of school leadership research and development **The Leadership Experience** Richard L. Daft, Patricia G. Lane, 2008
Packed with interesting examples and real world leadership the 4th edition of THE LEADERSHIP EXPERIENCE will help you develop an understanding of theory while acquiring the necessary skills and insights to become effective leaders Written expressly for courses teaching leadership theory and application the text integrates recent ideas and practices with established scholarly research in a way that makes the topic of leadership come alive **Real Leadership** Gilbert W. Fairholm, 2011-01-04 This text explains why values based spiritual leadership that coalesces employees into a harmonious group is the only way to successfully manage increasingly diverse workers in the 21st century A person's values are the most powerful factor defining his or her actions everyone has a value system or a spiritual component that triggers their behavior Our personal values are a more powerful force upon individual action than corporate policy procedures tradition or peer pressure Since the work environment is where the typical worker will spend the most time more than at home with family with friends or at church it is reasonable that workers will have spiritual demands as well as economic needs from their work lives Unfortunately this is a task managers are not prepared to meet Real Leadership How Spiritual Values Give Leadership Meaning argues that values based i.e. spiritual leadership is the only way to do leadership in today's globalized multi differentiated world The author traces the development of real leadership through five generations of theory then builds a strong case for the values leadership strategy because of its ability to unify workers and because it allows them to find personal meaning in the workplace task at hand
