This fascinating selection of photographs traces some of the many ways in which Edinburgh Trams have changed and developed over the last century *A Swing Through Time* Olive M. Geddes, 2007 This is an expertly guided tour through the earliest written records of golf that sheds light on its origins techniques and equipment and above all the social standing of the game as it developed from an outlawed activity to the world's most internationally popular game Golf became so fashionable it not only earned the disapproval of the political authorities but of the Church of England and the edict extended to women who apparently also participated Games with ball and stick probably have been a part of human history since pre recorded time The early origins of golf are a mystery although Olive Geddes tells us that colf played in a defined area and on

ice was played in the Low Countries from 1297 through the next century The Dutch version was a short game while the Scots evolved a long game that targeted getting the ball into a hole Long before its formalization the sale of golf balls by merchants or golf societies or clubs this most peaceful of sports evolved in extremely tumultuous times Without surviving documentary evidence and few recognizable images from before the mid 18th century the author's sources are original materials and books from the National Library of Scotland the co publisher of this book Chapters cover the unprofitable sport golf for royals James Melville the St Andrews student a school boys grammar Sir John Foulis of Ravelson Thomas Kincaid the golfing metropolis of St Andrews and golf in Edinburgh

Corporate Social Responsibility and Natural Resource Conflict Kylie McKenna, 2015-10-23 This book examines the possibilities and limitations of corporate social responsibility in minimising the violent conflict often associated with natural resource exploitation Through detailed and penetrating empirical analysis the author skilfully asks why previous corporate social responsibility practices have not always achieved their aims This theme is explored through an analysis of two of the most complex and protracted conflicts linked to natural resources in the Asia Pacific region Bougainville Papua New Guinea and West Papua Indonesia Drawing on first hand accounts of corporate executives and communities affected by resource conflict this book documents the translation of global corporate social responsibility into local peace Covering topics as diverse as post colonialism law revenue distribution security the environment and customary reconciliation this

ambitious text reveals how and why current corporate social responsibility initiatives may be unable to assist extractive companies avoid social conflict The study concludes that this is attributable to the failure of extractive companies to respond to the social and environmental issues of most concern to local host communities The idea is that extractive companies could actively contribute to peace building if they were to engage with the interdependencies between business activity and the root causes of conflict What sets this book apart is that it offers a holistic framework for extractive companies to engage with the complexity of resource conflict Interdependent Engagement is an integrated model of corporate social responsibility that encourages extractive companies to deal with the underlying causes of resource conflict rather than applying solutions or critiques of their symptoms
