

LEGO Technic is a popular building system that allows users to create a wide variety of structures and models. The system consists of a large number of different parts, including beams, pins, and connectors, which can be combined in many different ways to create complex and intricate designs. LEGO Technic is often used to build models of buildings, vehicles, and other structures, and it is also popular among hobbyists and collectors.

This sub-assembly is a small, simple structure that can be used as a base for other parts or as a decorative element in a larger model. It is made of a few basic parts, including a grey base plate and a tan-colored connector, and it is easy to build and use.
