

The steering system consists of a steering wheel, a steering gear assembly and a steering linkage.

The steering gear is a ball-nut type having good durability and less frictional resistance which allows steering control to be performed with a less steering effort. A coil spring is fitted in the ball joint of the steering linkage for purpose of absorbing road shocks.

The mainshaft of the steering gear assembly is formed integral with the steering shaft protected with the steering column. The lower part of the steering gear assembly is mounted to the vehicle frame and the upper part is elastically supported to the adjustable support bracket through a rubber seat.
