

International Classification Of Functioning, Disability & Health (ICF)

Disability has three dimensions: impairment, activity limitation, and participation restriction..

ICF is a universal tool for classification and reporting of disabilities that determines:

- The **FUNCTION** in which difficulties are experienced
- The body **STRUCTURE** affected
- Restriction in **ACTIVITIES** and **PARTICIPATION** it looks on both medical and social model
- Contributing **ENVIRONMENTAL** factors

ICF- Estimation of disabilities: Response and scoring

- **Core domain:** Seeing, Hearing, Mobility, Cognition, Self-care, Communication.
- **Response (self report):** No difficulties=0, Mild difficulties=1, Moderate difficulties=2, Severe difficulties=3, Extreme difficulties=4.
- **Scoring:** Range from 0 to 100.
 - Score of 40= significant difficulties
 - Score of 50= very significant difficulties

ICF shifts from the cause (impairment) to impact (difficulty in functioning).
