Short Answer

11. The National League for Nursing (NLN) established educational standards and criteria and is involved in the voluntary accreditation of nursing programs.
12. The purposes of National Association for Practical Nurse Education (NAPNES) and National Federation of Licensed Practical Nurses (NFLPN) are to:
Set standards for practical/vocational nursing programs.
Promote and protect practical/vocational nursing.
Educate and inform the general public about practical/vocational nursing.
13. LPN/LVNs function to provide specific services to patients under the direct supervision of a licensed provider, dentist, or registered nurse; to assist individuals, sick or well, in the performance of those activities contributing to health, to their recovery, and to gain independence as rapidly as possible or to have a peaceful death. The LPN/LVN is educated to be a responsible member of a health care team, performing basic therapeutic, rehabilitative, and preventive care to assigned patients. LPN/LVNs are continuing to provide care in all types of settings.

Multiple Choice

14. Answer: 1, 2, 4, 5 The LPN/LVN communicates findings to members of the health care team, demonstrates caring and empathy by using therapeutic communication skills with patients, administers care according to professional standards and collects data from multiple sources. The LPN/LVN would collaborate with the RN but would not independently create the care plan for a newly admitted patient.
15. Answer: 3 Reports indicate that challenges related to feelings of social isolation, stereotyping about men who choose nursing, nursing instructor's inability to incorporate masculine styles of caring in to the curriculum, and a lack of male role models in the profession may be to blame for the high attrition of male nursing students from nursing programs.
16. Answer: 4 Advance directives could include a health care power of attorney that states who should make health care decisions if the person is unable to make them. A "living will" outlines wishes about end-of-life care. Ideally, everyone should carefully consider advance directives and have discussions with family members, caregivers and the health care team.
17. Answer 2: One of the primary problems of the early nineteenth century hospitals was poor hygienic practices. Hospitals were dirty and overcrowded and care was mostly given by untrained persons.
18. Answer 4: The population is aging rapidly and there is an increased need for nursing services for this growing segment of the population.
19. Answer 3: "Nightingale Nurses" improved patient care and advanced the practice of nursing through good hygiene, sanitation, patient observation, accurate recordkeeping, nutritional improvement, and the introduction and use of new equipment.
