 South Africa** Godwin Khosa,2014-04-14 Looking at two smaller scale systemic school improvement projects implemented in  
 selected district circuits in the North West and Eastern Cape by partnerships between government JET Education Services  
 and private sector organisations this book captures and reflects on the experiences of the practitioners involved The  
 Systemic School Improvement Model developed by JET to address an identified range of interconnected challenges at district  
 school classroom and household level is made up of seven components In reflecting on what worked and what did not in the  
 implementation of these different components the different chapters set out some of the practical lessons learnt which could  
 be used to improve the design and implementation of similar education improvement projects Many of the lessons in this field  
 that remain under recorded to date relate to the step by step processes followed the relationship dynamics encountered at  
 different levels of the education system and the local realities confronting schools and districts in South Africa s rural areas  
 Drawing on field data that is often not available to researchers the book endeavours to address this gap and record these  
 lessons It is not intended to provide an academic review of the systemic school improvement projects It is presented rather to  
 offer other development practitioners working to improve the quality of education in South African schools an understanding  
 of some of the real practical and logistical challenges that arise and how these may be resolved to take further school  
 improvement projects forward at a wider district provincial and national scale      **Current And Advanced Researches In
