investors to enter their markets as well as for their residents to borrow and invest in international financial markets. Despite recurrent crises, liberalization has continued and in fact accelerated in the new millennium. Integration has been greatly facilitated by progressively looser monetary policy in the United States, notably the policies that culminated in debt crises in the United States and Europe, and the ultra-easy monetary policy adopted in response. Not only have their traditional cross-border linkages been deepened and external balance sheets expanded rapidly, but also foreign presence in their domestic financial markets and the presence of their nationals in foreign markets have reached unprecedented levels. As a result, new channels have emerged for the transmission of financial shocks from global boom-bust cycles. Almost all EDEs are now vulnerable irrespective of their balance of payments, external debt, net foreign assets, and international reserve positions, although these play an important role in the way such shocks could impinge on them. This is a matter for concern since the multilateral system still lacks mechanisms for orderly resolution of financial crises with international dimensions. *Playing with Fire* provides an empirical account of deeper integration of EDEs into the global financial system and discusses its implications for stability and growth, focusing on the role of policies in the new millennium in both EDEs and the United States and Europe. **Political Economy and Sociolinguistics** David Block, 2018-02-08. Shortlisted for the BAAL Book Prize 2019. This book explores how political economy intersects with sociolinguistics, specifically how neoliberalism, inequality, and social class mediate language in society issues. After the preface in which the author sets the scene for the content of the book, Chapter 1 is an extensive though selective review of sociolinguistics research which has been framed as political economic in orientation. The chapter concludes that such research generally contains little in the way of thorough and in-depth coverage of the key ideas and conceptual frameworks said to undergird it. With this consideration in mind, Chapters 2, 3, and 4 are organised around in-depth discussions of respectively political economy as a general disciplinary frame, neoliberalism as the variegated variety of capitalism dominant in the world today, and stratification, inequality, and social class as phenomena intrinsic to capitalism which in the neoliberal era have come to the fore as key issues. Drawing directly on the background provided in Chapters 2, 4, Chapters 5 and 6 explore two distinct political economy-informed lines of research: on the one hand, the neoliberal citizen, and on the other hand, discursive class warfare. The book ends with an epilogue addressing issues arising around political economy in sociolinguistics. **Reconstructing Urban Economics** Franklin Obeng-Odoom, 2016-08-15. Neoclassical economics, the intellectual bedrock of modern capitalism, faces growing criticisms as

many of its key assumptions and policy prescriptions are systematically challenged Yet there remains one field of economics where these limitations continue virtually unchallenged the study of cities and regions in built environment economics In this book Franklin Obeng Odoom draws on institutional Georgist and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about urban economics In doing so he demonstrates the widespread tensions and contradictions in the status quo showing how to reconstruct urban economics in order to create a more just society and environment
