

INTRODUCTION

Now that you have the skills in disassembling a computer, I believe that you are ready to take another step of this module which is assembling a computer. All you need to do is follow the step by step procedures provided in this module.

Computer Hardware Assembly

Step 1. Prepare your workplace.

1. Take inventory of the different computer parts.

Before you start, take an inventory of your parts. Do not begin assembling your computer if you don't have everything you need. Begin the step-by-step process once you are ready with everything you need.

Take Inventory of the Different Computer Parts

2. Make space and make time.

Building a PC takes up space – about a dining room table worth. So make sure you have plenty of working room and a few hours to proceed with minimal interruption. Work on a flat, stable table top surface, or bare floor, where you have room to layout all of the items.

3. Prepare Grounding Protection.

Use an inexpensive antistatic wrist strap. Make sure you are wearing your antistatic wrist strap correctly (it does you no good at all if you do not wear it!), and you are ready to proceed.
