Introductions

What's an Introduction?

- ❑ An introduction is a method to *familiarize and orient* your readers.
- ❑ The content of an introduction depends on its *purpose* and the *audience*.
- ❑ All models share a *direct approach*. Don't hide your main point or save it until the end of the paper.

What's the Purpose of an Introduction in Scientific Writing?

- ❑ Provide the *context* of your work (create your research space, define gap in knowledge, set up the direction you'll take in your discussion section).
- ❑ State your *focus* (hypothesis, question).
- ❑ Provide *justification* for your work (how your work can answer the question).

What are Some Common Pitfalls of an Introduction Section?

- ❑ Including *unnecessary background* or being repetitive.
- ❑ *Exaggerating* (or understating) the importance of your work.
- ❑ Using *lackluster* openers and *weak* follow-through in the body of your introduction.
- ❑ Not grounding the work in a *context* that will be important to your reader.
- ❑ Not *focusing* on a clear and compelling research question or hypothesis.

Guidelines for Introductions from Two Scientific Organizations

From the International Committee of Medical Journal Editors:

State the purpose of the article and summarize the rationale for the study or observation. Give only strictly pertinent references and do not include data or conclusions from the work being reported.

From the American Society for Microbiology:

The introduction should supply sufficient background information to allow the reader to understand and evaluate the results of the present study without referring to previous publications on the topic. The introduction should also provide the hypothesis that was addressed or the rationale for the present study. Use only those references required to provide the most salient background rather than an exhaustive review of the topic.

Methods

What are Some Goals of a Methods Section?

- ❑ Present the **experimental design**.
- ❑ Provide enough detail to allow readers to **interpret your results**.

Guide To Science Writing

Scientific Writing 3.0: A Reader And Writer's Guide Jean-luc Lebrun, Justin Lebrun, 2021-10-13 The third edition of this book aims to equip both young and experienced researchers with all the tools and strategy they will need for their papers to not just be accepted but stand out in the crowded field of academic publishing It seeks to question and deconstruct the legacy of existing science writing replacing or supporting historically existing practices with principle and evidence driven styles of effective writing It encourages a reader centric approach to writing satisfying reader scientists at large but also the paper's most powerful readers the reviewer and editor Going beyond the baseline of well structured scientific writing this book leverages an understanding of human physiological limitations memory attention time to help the author craft a document that is optimized for readability Through real and fictional examples hands on exercises and entertaining stories this book breaks down the critical parts of a typical scientific paper Title Abstract Introduction Visuals Structure and Conclusions It shows at great depth how to achieve the essential qualities required in scientific writing namely being clear concise convincing fluid interesting and organized To enable the writer to assess whether these parts are well written from a reader's perspective the book also offers practical

metrics in the form of six checklists and even an original Java application to assist in the evaluation *Successful Scientific Writing* Janice R. Matthews, Robert W. Matthews, 2007-10-11 The detailed practical step by step advice in this user friendly guide will help students and researchers to communicate their work more effectively through the written word Covering all aspects of the writing process this concise accessible resource is critically acclaimed well structured comprehensive and entertaining Self help exercises and abundant examples from actual typescripts draw on the authors extensive experience working both as researchers and with them Whilst retaining the user friendly and pragmatic style of earlier editions this third edition has been updated and broadened to incorporate such timely topics as guidelines for successful international publication ethical and legal issues including plagiarism and falsified data electronic publication and text based talks and poster presentations With advice applicable to many writing contexts in the majority of scientific disciplines this book is a powerful tool for improving individual skills and an eminently suitable text for classroom courses or seminars Scientific Writing 2.0 Jean-Luc Lebrun, 2011 The book helps scientists write papers for scientific journals Using the key parts of typical scientific papers Title Abstract Introduction Visuals Structure and Conclusions it shows through numerous examples how to achieve the essential qualities required in scientific writing namely being clear concise convincing fluid interesting and organized To enable the writer to assess whether these parts are well written from a reader s perspective the book also offers practical metrics in the form of six checklists and even an original Java application to assist in the evaluation The focus of the book is on self and reader assisted assessment of the scientific journal article It is also the first time that a book on scientific writing takes a human factor view of the reading task and the reader scientist By revealing and addressing the physiological causes that create substantial reading difficulties namely limited reader memory attention span and patience the book guarantees that writing will gain the much coveted reader centered quality A Guide to Writing in Education Stephen A. Bernhardt, Nancy Sommers, 2020-02-10 A Guide to Writing in Education part of the Writer s Help Guidebook Series offers writing and research support for students writing in the discipline This compact yet comprehensive guidebook provides the value students want with the essential instruction they need to complete writing tasks successfully Students will find advice on how to think read research and design and write papers and projects and presentations like an education professional Coverage includes the following topics all focused on the specific needs of writers in education Writing process Conventions in the discipline Integrating and evaluating sources Documentation style required in the discipline with plenty of models Sample student writing A Guide to Writing in the Sciences Andrea A. Gilpin, Patricia Patchet-Golubev, 2000-12-15 While teaching writing to undergraduate science students Gilpin and Patchet Golubev discovered that although many relatively sophisticated manuals for scientific writing exist most are aimed at mainly professionals or specialists and are of little practical use to the majority of students This introductory guide fills that large gap Direct and friendly in tone the book provides clear and concise explanations of the basic elements of scientific writing required of students The various genres

are detailed in particular lab reports and research essays as well as scientific articles poster presentations proposals and even essay exams Similarities and differences among these genres are underlined in order to illustrate structural principles and to provide practical writing tips A detailed chapter covers the elements of grammar and punctuation that are fundamental to all good writing it also outlines some key points about scientific style in particular Using accessible language throughout the authors organize their material with helpful lists copious examples and boxed writing and research tips There are several useful appendices including a classification chart of organisms and an international units conversion chart an index and selected bibliography on science and technical writing Unique in its field this guide offers a practical and valuable guide to the basic principles and conventions of science writing The Scientist's Guide to Writing Stephen B. Heard, 2016-04-12 A concise and accessible primer on the scientific writer's craft The ability to write clearly is critical to any scientific career The Scientist's Guide to Writing provides practical advice to help scientists become more effective writers so that their ideas have the greatest possible impact Drawing on his own experience as a scientist graduate adviser and editor Stephen Heard emphasizes that the goal of all scientific writing should be absolute clarity that good writing takes deliberate practice and that what many scientists need are not long lists of prescriptive rules but rather direct engagement with their behaviors and attitudes when they write He combines advice on such topics as how to generate and maintain writing momentum with practical tips on structuring a scientific paper revising a first draft handling citations responding to peer reviews managing coauthorships and more In an accessible informal tone The Scientist's Guide to Writing explains essential techniques that students postdoctoral researchers and early career scientists need to write more clearly efficiently and easily Emphasizes writing as a process not just a product Encourages habits that improve motivation and productivity Explains the structure of the scientific paper and the function of each part Provides detailed guidance on submission review revision and publication Addresses issues related to coauthorship English as a second language and more The Scientist's Guide to Writing, 2nd Edition Stephen B. Heard, 2022-02-08 This is a new edition of The Scientists Guide to Writing published in 2016 As a reminder the book provided practical advice on writing covering topics including how to generate and maintain writing momentum tips on structuring a scientific paper revising a first draft handling citations responding to peer reviews and managing coauthorships among other topics For the 2nd edition Heard has made several changes specifically expanding the chapter on writing in English for non native speakers adding two chapters one on efficient and effective reading and one on selecting the right journal and how to use preprint sites doubled the number of exercises various other add ons to existing chapters including information on reporting statistical results handling disagreement among peer reviewers and managing co authorships *Scientists Must Write* Robert Barrass, 2002 P 160
