Guide Intervention Psychological Strategy:

Psychological Interventions Mary Ballou, 1995-09-26 This book examines a variety of psychological intervention strategies used in counseling and therapy to bring about change. It is a handbook of strategies which reviews major forms of interventions, reviews research evidence of effectiveness, and challenges existing theoretical boundaries. In contrast to existing handbooks, Ballou offers interventions identified by their goal of change rather than by a particular theoretical orientation or the kind of difficulty the client is undergoing. Each chapter describes a strategy, presents clear instruction for its use, and considers appropriate and inappropriate uses for the strategy. Each chapter also addresses the research evidence underlying claims of effectiveness. Edited by an academic and practitioner of counseling psychology, the book seeks to address the needs of both professionals in the field and students and scholars in the academic community. **System level**

Servili, Keng-Yen Huang, Joanna Lai, Stefan Swartling Peterson, 2022-05-27 **A Guide to Treatments That Work** Peter E. Nathan, Jack M. Gorman, 2015-06-26 Like its predecessors, this fourth edition of *A Guide to Treatments That Work* offers detailed chapters that review the latest research on pharmacological and psychosocial treatments that work for the full range of psychiatric and psychological disorders, written in most instances by clinical psychologists and psychiatrists who have been major contributors to that literature. Similarly, the standards by which the authors were asked to evaluate the methodological rigor of the research on treatments have also remained the same. Each chapter in *A Guide to Treatments That Work* follows the same general outline: a review of diagnostic cues to the disorder; a discussion of changes in the nomenclatures from DSM IV to DSM 5; and then a systematic review of research, most of which has been reported within the last few years, that represents the evidence base for the treatments reviewed. In all, 26 of the volume's 28 chapters review the evidence base for 17 major syndromes. Featuring this coverage is a *Summary of Treatments that Work*, an extended matrix offering a ready reference by syndrome of the conclusions reached by the chapter authors on treatments that work reviewed in their chapters. New to this edition are two chapters at the beginning of the book. Chapter 1 details two perplexing issues raised by critics of DSM 5: the unrealized potential of neuroscience biomarkers to yield more accurate and reliable diagnoses, and the lingering problem of conflicts of interest in pharmaceutical research. Chapter 2 contrasts Native American and western ways of identifying effective treatments for mental and physical disorders, concluding that evidence-informed, culture-based interventions sometimes constitute best practices in Native communities. Two chapters detailing pharmacological treatments for pediatric bipolar disorder (Chapter 9) and pediatric depressive disorder (Chapter 12) have also been added. More than three quarters of the chapters are written by colleagues who also contributed to most or all of the previous editions. Hence, this new edition provides up-to-date information on the quality of research on treatment efficacy and effectiveness provided by
