

Human Growth and Development Case Study

The paper is focused primarily on cognitive, physical, and social developments. This paper will discuss the relationship I see between theories of observing and planning and theories of development in childhood education. Michael is 6 years and 11 months old. It is October and he is in first class. Michael rarely makes contact, and when he is directly asked to do so he turns and looks at the back wall of the classroom. He displays this behavior also when asked to participate in group work.

When in class he maintains a low level of continuous dialogue which is never directed towards other students. When he asks questions in class they never have any relevance to the immediate context of the lesson. When he talks to other students he talks at them rather than to them and does not require a response. It is also evident in his interaction with the teacher that his conversation lacks any element of transaction. He demonstrates a literal understanding of instruction I. E. Recently he was told to sit down and finish his work and not to move until he was finished.

Michael did finish the work but continued to sit all through lunch until the teacher on yard duty noticed him sitting in the empty classroom. He reported he had been told not to move. It is clear that he does not understand facial expressions and body language and communication needs to be kept at a very concrete and unambiguous level. Increasingly he is becoming socially isolated in the class as he displays little interest in the other children and they find his behavior difficult to understand.

At a time in their lives when children are beginning to form real friendships his difficulties are becoming more apparent in the social area. He means quiet frequently that the other children call him a baby out in the yard and this has become an issue with his parents as they claim he is being bullied in the yard. Close observation of Michael reveals that he does in fact behave in a babyish manner quiet a lot of time and lacks levels of independence consistent with his age group. He along with the rest of his class has completed the Micro T. And Stigma T. Sets of reading and math attainment. On both tests Michael scores two standard deviations above the norm indicating that his intellectual ability is very high. This in turn calls into question his lack of ability to function in the social and communication areas. A report is compiled for all students prior to the annual parent teacher meeting. When completing Michael's report form the only option for the teacher is to tick "poor" in all the sections relating to social development. At the parent teacher meeting Michael's social and communication skills become the focus of the discussion.

They reluctantly agree that they had noticed some worrying behavior particularly when they compared his development to that of their younger son who is four. They report that they try to provide Michael with opportunities to socialize but that on occasion when he invites

Hauspie,2013-03-14 One morning in 1969 out of the blue I received a letter which both distressed and astonished me It was from a Prof S R Das in Calcutta who requested me to accept for eventual analysis a mountain of anthropometric data he had accumulated as he was ill and did not expect to survive to analyse it himself The data provided the astonishment twenty two anthropometric characters recorded every six months or a year over a period of 14 years in a mixed longitudinal study of some 560 children aged six months to twenty years Most were in families with siblings also in the study and every child was measured every time by S R Das himself The archive was unique combining the personal anthropometry of R H Whitehouse in the Harpenden Growth Study and the family approach of the Fels Growth Study This was a study of which neither I nor anyone of my acquaintance had heard Even in India Prof Das work was scarcely known It turned out Das was a scholarly man quiet and unassuming absolutely committed to his Sarsuna Barisha Growth Study just the obverse of the professional showman Clearly this was not a request I could refuse although I already had in hand enough projects to occupy Siva himself
