

VI. ONCOLOGY II

3. Chemotherapy:

a. Action of Chemotherapy:

- The goal of chemotherapy is to eliminate or reduce the number of cancer cells by destroying the cells as they are developing.
- 1) Chemotherapy drugs that attack a specific phase of cell development are called cell - specific chemo drugs.
 - 2) Chemotherapy drugs that work at all or any phase of cell development are called cell cycle non-specific.
 - 3) These drugs work best while the tumor cells are actively growing.
 - Most active growth is when the tumor first begins to develop.
 - Early detection for cancer is best.

b. Precautions for Chemotherapy:

1) Precautions for Administration of Chemotherapy:

- Chemotherapy drugs can be administered by multiple routes: oral, topical, IM, IV and intracavity (directly into a body cavity).
- Always be careful when handling antineoplastic drugs because of the dangers of exposure. These drugs can be carcinogenic, mutagenic and teratogenic.
- Look up drug information before administering chemo to make sure you are handling it correctly.
- Exposure can occur by drug contact with the skin or mucous membranes, inhalation, ingestion or accidental injection.

Practical Geriatric Oncology Arti Hurria, Harvey Jay Cohen, 2010-09-13

The risk of cancer increases with age and the number of older adults seeking treatment is increasing dramatically in line with the aging population. The care of older patients differs from that of younger adults because of differences in the biology of the tumor, age-related differences in host physiology, comorbidity burden, and psychosocial issues which might impact the efficacy and side effects of cancer therapy. *Practical Geriatric Oncology* is a comprehensive evidence-based text that synthesizes the growing literature in this field and provides practical guidelines to the care of older adults with cancer. Coverage includes patient assessment, management of solid tumors and hematologic malignancies, the impact of age on the pharmacology of cancer therapy, surgical oncology, and radiation oncology in the older adult, symptom management, and supportive care. In addition to serving as core reading for oncologists and hematologists, the book will also be a useful work for other healthcare professionals who provide oncology care, including surgeons, radiation oncologists, palliative care doctors, primary care providers, geriatricians, and nurses.
