

## Leica Builder 503 Total Station instructions

(Refer to either the User Manual or How-To Guide for specifics. The following is the most common setup.)

### Before Going in the Field

Make sure the batteries are charged, and one is installed in the door on the left side. The battery compartment will hold different size batteries; we have two of the smaller ones, Leica type GEB211 Li Ion 7.4V/2.2 Ah. Probably should make sure a flash drive is mounted in the compartment on the right side.

### Tour of the Instrument

- a) Compartment for USB memory stick & USB cable ports
- b) Bluetooth antenna
- c) Alignment sight
- d) Detachable carrying handle
- e) Telescope with integrated EDM (electronic distance meter)
- f) Vertical control knob
- g) On/Off key
- h) Switch key – we probably don't need to use this:
  - Top: laser pointer toggle
  - Bottom: switch between Measure/record, All in 1, and Measure
- i) Horizontal control knob
- j) Optional second keyboard (not on our unit)
- k) Telescope focusing ring
- l) Eyepiece; focusing graticule
- m) Battery holder
- n) Serial interface
- o) Footscrew
- p) Display
- q) Keyboard

**Surveying for Civil and Mine Engineers** John Walker,Joseph L. Awange,2017-08-04 Indeed the most important part of engineering work and also of other scientific work is the determination of the method of attacking the problem whatever it may be whether an experimental investigation or a theoretical calculation It is by the choice of a suitable method of attack that intricate problems are reduced to simple phenomena and then easily solved Charles Proteus Steinmetz The structure of this book is to provide a sequence of theory workshops and practical field sessions that mimic a simple survey project designed for civil and mining engineers The format of the book is based on a number of years of experience gained in presenting the course at undergraduate and post graduate

levels The course is designed to guide engineers through survey tasks that the engineering industry feels is necessary for them to have a demonstrated competency in surveying techniques data gathering and reduction and report presentation The course is not designed to make engineers become surveyors It is designed to allow an appreciation of the civil and mine engineering surveyor's job There are many excellent text books available on the subject of engineering surveying but they address the surveyor not the engineer Hopefully this book will distil many parts of the standard text book A lot of the material presented is scattered through very disparate sources and has been gathered into this book to show what techniques lie behind a surveyor's repertoire of observational and computational skills and provide an understanding of the decisions made in terms of the presentation of results The course has been designed to run over about 6 weeks of a semester providing a half unit load which complements a computer aided design CAD based design project
