 Xiaohong Zhang Zhirou Ma **Reconceptualising Maths and Science Teaching and Learning** Stephen Dinham, Russell
 Tytler, David Hoxley, Deborah Corrigan, 2017-11-01 How do we enable young people to imagine themselves as the next
 generation of STEM professionals How do we do this in a way that engages the desire to learn and explore In Australia there
 is increasing concern at the declining participation in advanced level school mathematics and physical sciences fewer
 students electing to study STEM programs at university and evidence of declining performance of Australian students on
 international comparative tests in mathematics and science This timely book highlights the need to reconceptualise Maths
 and Science Teacher Education Programs ReMSTEP in order to revitalise maths and science teaching approaches within
 primary and secondary schools Through a series of seven innovations such as offering maths and science specialisations
 within primary pre service teaching programs or creating opportunities to connect scientists and mathematicians with both
 pre service teachers and practitioners in developing activities for school contexts ReMSTEP recognises that teacher
 graduates are powerful change agents for making maths and science curricula more engaging challenging and relevant for
 primary and secondary students This substantively researched text based on ReMSTEP s extensive trialling and exhaustive
 consultation with researchers and practitioners alike enriches the debate on the educational relevance of maths and science
 and is a crucial reference for educational decision makers lecturers and pre service teachers and school leaders Part A
 examines the challenges around science and maths education Part B explores through case studies the seven ReMSTEP

innovations around which the activities were organised Part C provides an overview of the impacts of the innovations and explores the implications of the findings

Hybrid Solutions for the Modelling of Complex Environmental Systems Christian E. Vincenot, Stefano Mazzoleni, Lael Parrott, 2017-01-11 Systems studied in environmental science due to their structure and the heterogeneity of the entities composing them often exhibit complex dynamics that can only be captured by hybrid modeling approaches While several concurrent definitions of hybrid modeling can be found in the literature it is defined here broadly as the approach consisting in coupling existing modelling paradigms to achieve a more accurate or efficient representation of systems The need for hybrid models generally arises from the necessity to overcome the limitation of a single modeling technique in terms of structural flexibility capabilities or computational efficiency This book brings together experts in the field of hybrid modelling to demonstrate how this approach can address the challenge of representing the complexity of natural systems Chapters cover applied examples as well as modeling methodology

Stochastic Processes and Models in Operations Research Anbazhagan, Neelamegam, 2016-03-24 Decision making is an important task no matter the industry Operations research as a discipline helps alleviate decision making problems through the extraction of reliable information related to the task at hand in order to come to a viable solution Integrating stochastic processes into operations research and management can further aid in the decision making process for industrial and management problems Stochastic Processes and Models in Operations Research emphasizes mathematical tools and equations relevant for solving complex problems within business and industrial settings This research based publication aims to assist scholars researchers operations managers and graduate level students by providing comprehensive exposure to the concepts trends and technologies relevant to stochastic process modeling to solve operations research problems
