This New Ocean William E. Burrows,2010-09-29 It was all part of man s greatest adventure landing men on the Moon and sending a rover to Mars finally seeing the edge of the universe and the birth of stars and launching planetary explorers across the solar system to Neptune and beyond The ancient dream of breaking gravity s hold and taking to space became a reality only because of the intense cold war rivalry between the superpowers with towering geniuses like Wernher von Braun

and Sergei Korolyov shelving dreams of space travel and instead developing rockets for ballistic missiles and space spectacles Now that Russian archives are open and thousands of formerly top secret U S documents are declassified an often startling new picture of the space age emerges the frantic effort by the Soviet Union to beat the United States to the Moon was doomed from the beginning by gross inefficiency and by infighting so treacherous that Winston Churchill likened it to dogs fighting under a carpet there was more than science behind the United States suggestion that satellites be launched during the International Geophysical Year and in one crucial respect Sputnik was a godsend to Washington the hundred odd German V 2s that provided the vital start to the U S missile and space programs legally belonged to the Soviet Union and were spirited to the United States in a derring do operation worthy of a spy thriller despite NASA s claim that it was a civilian agency it had an intimate relationship with the military at the outset and still does a distinction the Soviet Union never pretended to make constant efforts to portray astronauts and cosmonauts as Boy Scouts were often contradicted by reality the Apollo missions to the Moon may have been an unexcelled political triumph and feat of exploration but they also created a headache for the space agency that lingers to this day This New Ocean is based on 175 interviews with Russian and American scientists and engineers on archival documents including formerly top secret National Intelligence Estimates and spy satellite pictures and on nearly three decades of reporting The impressive result is this fascinating story the first comprehensive account of the space age Here are the strategists and war planners engineers and scientists politicians and industrialists astronauts and cosmonauts science fiction writers and journalists and plain ordinary unabashed dreamers who wanted to transcend gravity s shackles for the ultimate ride The story is written from the perspective of a witness who was present at the beginning and who has seen the conclusion of the first space age and the start of the second Chemistry, General, Medical, and Pharmaceutical John Attfield,1883 **Faith 7** Colin Burgess,2016-07-17 This book celebrates the final spaceflight in the Mercury series flown by NASA astronaut Gordon Cooper who led an adventurous life in the cockpit of airplanes and spacecraft alike and on his Mercury mission he became the last American ever to rocket into space alone He flew in the Mercury and Gemini programs and served as head of flight crew operations in both the Apollo and Skylab programs Based on extensive research and first person interviews this is a complete history of the Faith 7 flight and its astronaut Cooper later gained notoriety following the release of the movie The Right Stuff in which he was depicted by Dennis Quaid but Burgess discovers there was even more drama to his story It completes the Pioneers in Early Spaceflight subseries in fitting fashion *The Academy* ,1877 Mercury Outboards Service Manual Mercury Marine,1984 Girls to the Rescue Emily Hamilton-Honey,Susan Ingalls Lewis,2020-05-25 During World War I as young men journeyed overseas to battle American women maintained the home front by knitting fundraising and conserving supplies These became daily chores for young girls but many longed to be part of a larger more glorious war effort and some were A new genre of young adult books entered the market written specifically with the young girls of the war period in mind and demonstrating the

wartime activities of women and girls all over the world Through fiction girls could catch spies cross battlefields man machine guns and blow up bridges These adventurous heroines were contemporary feminist role models creating avenues of leadership for women and inspiring individualism and self discovery The work presented here analyzes the powerful messages in such literature how it created awareness and grappled with the engagement of real girls in the United States and Allied war effort and how it reflects their contemporaries awareness of girls importance
