The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways. One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship, information expertise and consumption. This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets, the latter including a naturally evolving reputation or consciously developed competitive identity or brand. The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America, Europe, East Asia and Australasia. Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities' characteristics and positions in the global urban hierarchy. On top of this, social and urban challenges such as creative class struggle are also discussed. The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results. This book will be of interest to scholars and practitioners working in the areas of local economic development, urban planning, public management and branding.

Beyond Energy Jacopo Maria Pepe, 2017-11-22 Jacopo Maria Pepe examines the rapid development of non energy transport infrastructure in the broader Eurasian space. By doing so, the author considers the ongoing structural transformation of the Eurasian continent against the backdrop of deepening commercial interconnectivity in Eurasia into broader areas of trade supported by the rapid development of rail connectivity. He frames this process in a long wave historical analysis and considers in detail the geopolitical, geo economic and theoretical

implications of deepening physical connectivity for the relationships among China Russia Central Asia and the European Union

Governing Metropolitan Areas David K. Hamilton, 2014-04-24 Interest and research on regionalism has soared in the last decade Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts to solve problems that stretch across urban centers and their surrounding suburbs Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance *Governing Metropolitan Areas* describes and analyzes structure to understand the how and why of regionalism in our global age The book covers governmental institutions and their evolution to governance but with a continual focus on institutions David Hamilton provides the necessary comprehensive in depth description and analysis of how metropolitan areas and governments within metropolitan areas developed efforts to restructure and combine local governments and governance within the polycentric urban region This second edition is a major revision to update the scholarship and current thinking on regional governance While the text still provides background on the historical development and growth of urban areas and governments efforts to accommodate the growth of metropolitan areas this edition also focuses on current efforts to provide governance through cooperative and collaborative solutions There is also now extended treatment of how regional governance outside the United States has evolved and how other countries are approaching regional governance

Food Sovereignty in International Context Amy Trauger, 2015-02-11 Food sovereignty is an emerging discourse of empowerment and autonomy in the food system with the development of associated practices in rural and some urban spaces While literature on food sovereignty has proliferated since the first usage of the term in 1996 at the Rome Food Summit most has been descriptive rather than explanatory in nature and often confuses food sovereignty with other movements and objectives such as alternative food networks food justice or food self sufficiency This book is a collection of empirically rich and theoretically engaged papers across a broad geographical spectrum reflecting on what constitutes the politics and practices of food sovereignty They contribute to a theoretical gap in the food sovereignty literature as well as a relative shortage of empirical work on food sovereignty in the global North much previous work having focussed on Latin America Specific case studies are included from Canada Norway Switzerland southern Europe UK and USA as well as Africa India and Ecuador The book presents new research on the emergence of food sovereignties It offers a wide variety of empirical examples and a theoretically engaged framework for explaining the aims of actors and organizations working toward autonomy and democracy in the food system

Rasika Jayasuriya, 2021-06-22 This book focuses on the neglected yet critical issue of how the global migration of millions of parents as low waged migrant workers impacts the rights of their children under international human rights law The work provides a systematic analysis and critique of how the restrictive features of policies governing temporary labour migration interfere with provisions of the Convention on the Rights of the Child that protect the child parent relationship and parental role in children s lives Combining social and legal research it identifies both potential harms to children s well being caused by prolonged child parent separation and State duties to protect this relationship which is deliberately disrupted by temporary labour migration policies The book boldly argues that States benefitting from the labour of migrant workers share responsibility under international human rights law to mitigate harms to the children of these workers including by supporting effective measures to maintain transnational child parent relationships It identifies measures to incorporate children s best interests into temporary labour migration policies offering ways to reduce interferences with children s family rights This book fills a gap that emerges at the intersection of child rights studies migration research and existing literature on the purported nexus between labour migration and international development It will be a valuable resource for academics researchers and policymakers working in these areas The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003028000> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Quarterly Current Affairs - April to June 2017 for Competitive Exams Disha

This book provides recommendations and solutions that derive from current situations, experiences and observations in Africa. This book is a must read for urban planners, environmental engineering students and lecturers, environmental consultants and policy makers.  An alien spaceship crash landed in my playground today. For one primary school in England, this was not an ordinary day. It was a fabulous day of inspiration, writing, drawing, discovering and learning for the pupils, the staff and the parents. But the best thing of all, the only truly out of the ordinary thing was the alien spaceship. So how do you make creativity a more everyday part of primary teaching? Teachers and trainees agree that creativity is a fabulous thing. But to get creative approaches into everyday teaching, you need to tackle the question: what is creativity? This book explores this question in an accessible and practical way. It helps trainees to do more than know it when they see it by helping them to understand the separate and very diverse elements of creativity. The third edition of this popular text retains key material but it has been updated and revised to include two new chapters on the creative curriculum along with links throughout to the Standards and the new National Curriculum. This book will help you enhance your teaching so you and the children in your class can be fellow explorers, adventurous discoverers and spontaneous investigators.
