Handbook of Manufacturing Industries in the World Economy John R. Bryson, Jennifer Clark, Vida Vanchan, 2015-04-30

This interdisciplinary volume provides a critical and multi disciplinary review of current manufacturing processes practices and policies and broadens our understanding of production and innovation in the world economy Chapters highlight how firms

**Connections** Jean Hillier, Jonathan Metzger, 2017-05-15 The professional practice as well as the academic discipline of planning has been fundamentally re invented all over the world in recent decades In this astonishing transition the thinking and scholarship of Patsy Healey appears as a constantly recurring influence and inspiration around the globe The purpose of this book is to present discuss and celebrate Healey s seminal contributions to the development of the theory and practice of spatial planning The volume contains a selection of 13 less readily available but nevertheless key texts by Healey which have been selected to represent the trajectory of Patsy s work across the several decades of her research career 12 original chapters by a wide range of invited contributors take the ideas in the reprinted papers as points of departure for their own work tracing out their continuing relevance for contemporary and future directions in planning scholarship In doing so these chapters tease out the themes and interests in Healey s work which are still highly relevant to the planning project The title Connections symbolises relationality possibly the most outstanding element linking Patsy s ideas The book showcases the wide international influence of Patsy s work and celebrates the whole trajectory of work to show how many of her ideas on for instance the role of theory in planning processes of change networking as a mode of governance how ideas spread and ways of thinking planning democratically were ahead of their time and are still of importance

*Psychosocial Perspectives on Peacebuilding* Brandon Hamber, Elizabeth Gallagher, 2014-11-04 The book Psychosocial Perspectives on Peacebuilding offers a template for those dealing with the aftermath of armed conflict to look at peacebuilding through a psychosocial lens This Volume and the case studies that are in it starts from the premise that armed conflict and the political violence that flows from it are deeply contextual and that in dealing with the impact of armed conflict context matters The book argues for a conceptual shift in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches the contributors argue that such interventions and practices should in themselves shape social change This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress The chapters in this book describe experiences within very different contexts including Guatemala Jerusalem Indian Kashmir Mozambique Northern Ireland South Africa and Sri Lanka The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster wider social change Psychosocial Perspectives on Peacebuilding is essential reading for social and peace psychologists as well as for students and researchers in the field of conflict and peace studies and for psychosocial practitioners and those working in

post conflict areas for NGO s      **Territorial Disputes in the South China Sea** J. Huang,A. Billo,2014-12-09 Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved complex territorial disputes This volume offers detailed insights into a range of country perspectives addressing the historical legal structural regional and multilateral dimensions of these disputes      **The Uneven Offshore World** Justin Robertson,Michael Tyralla,2022-03-24 Informed by world systems analysis this book examines the shifting patterns of accommodation and resistance to the offshore world with a particular focus on Mauritius as a critical but underappreciated offshore node mediating foreign investment into India and Africa Drawing on a large pool of financial data and elite interviews the authors present the first detailed comparative study of the Mauritius India and Mauritius Africa offshore relationships These relationships serve as indicative test cases of the contemporary global tax reform agenda and its promise to rein in offshore finance Whereas India s economic power and multilateral track record have enabled it to actively shape this agenda and implement it in a robust manner most African countries have found themselves either unable to meet its stringent criteria or unwilling to do so out of fear that it might discourage investment Its impact on offshore financial centers has likewise been limited A few of the least sophisticated ones appear to have fallen by the wayside but the rest have either remained largely unaffected or like Mauritius succeeded in consolidating their operations and surviving the current round of regulatory headwinds The findings suggest that the contemporary global tax reform agenda has thus far not only failed to make good on its promise but also actually reinforced numerous existing power hierarchies The Uneven Offshore World is written in an accessible style and aimed at readers without specialized knowledge of tax issues      *The Road to Unfreedom* Timothy Snyder,2019-04-09 NEW YORK TIMES BESTSELLER From the author of On Tyranny comes a stunning new chronicle of the rise of authoritarianism from Russia to Europe and America A brilliant analysis of our time Karl Ove Knausgaard The New Yorker With the end of the Cold War the victory of liberal democracy seemed final Observers declared the end of history confident in a peaceful globalized future This faith was misplaced Authoritarianism returned to Russia as Vladimir Putin found fascist ideas that could be used to justify rule by the wealthy In the 2010s it has spread from east to west aided by Russian warfare in Ukraine and cyberwar in Europe and the United States Russia found allies among nationalists oligarchs and radicals everywhere and its drive to dissolve Western institutions states and values found resonance within the West itself The rise of populism the British vote against the EU and the election of Donald Trump were all Russian goals but their achievement reveals the vulnerability of Western societies In this forceful and unsparing work of contemporary history based on vast research as well as personal reporting Snyder goes beyond the headlines to expose the true nature of the threat to democracy and law To understand the challenge is to see and perhaps renew the fundamental political virtues offered by tradition and demanded by the future By revealing the stark choices before us between equality or oligarchy individuality or totality truth and falsehood Snyder restores our understanding of the basis of our way of life

offering a way forward in a time of terrible uncertainty

### **Disaster Research and the Second Environmental Crisis**

James Kendra, Scott G. Knowles, Tricia Wachtendorf, 2019-04-04 The 50th anniversary of the Disaster Research Center of the University of Delaware provoked a discussion of the field's background, its accomplishments, and its future directions. Participants representing many disciplines brought new methods to bear on perennial problems relevant to effective disaster management and policy formation. However, new concerns were raised stemming from the fact that we live today in a globally unfolding environmental crisis every bit as pressing and worrisome as that of the 1960s when the Disaster Research Center was founded. This volume brings together ideas of participants from that workshop as well as other contributors. Topics include the history and evolution of disaster research, innovations in disaster management, disaster policy, and ethical considerations of disaster research. Readers interested in science and technology, public policy, community action, and the evolution of the social sciences will find much of interest in this collection.

**Incomplete Streets** Stephen Zavestoski, Julian Agyeman, 2014-08-27 The Complete Streets concept and movement in urban planning and policy has been hailed by many as a revolution that aims to challenge the auto normative paradigm by reversing the broader effects of an urban form shaped by the logic of keeping automobiles moving. By enabling safe access for all users, Complete Streets promise to make cities more walkable and livable and at the same time more sustainable. This book problematizes the Complete Streets concept by suggesting that streets should not be thought of as merely physical spaces but as symbolic and social spaces. When important social and symbolic narratives are missing from the discourse and practice of Complete Streets, what actually results are incomplete streets. The volume questions whether the ways in which complete streets narratives, policies, plans, and efforts are envisioned and implemented might be systematically reproducing many of the urban spatial and social inequalities and injustices that have characterized cities for the last century or more. From critiques of a mobility bias rooted in the neoliberal foundations of the Complete Streets concept to concerns about resulting environmental gentrification, the chapters in *Incomplete Streets* variously call for planning processes that give voice to the historically marginalized and more broadly that approach streets as dynamic, fluid, and public social places. This interdisciplinary book is aimed at students, researchers, and professionals in the fields of urban geography, environmental studies, urban planning, and policy, transportation planning, and urban sociology.

**The Internet as Second Action Space** Aharon Kellerman, 2014-07-11 One of the most significant and important advancements in information and communication technology over the past 20 years is the introduction and expansion of the Internet. Now almost universally available, the Internet brings us email, global voice, and video communications, research repositories, reference libraries, and almost unlimited opportunities for daily activities. Bridging geographical distances in unprecedented ways, the Internet has impacted all aspects of our daily lives, from facilitating the running of businesses, the attainment of services, and keeping in touch with friends and family. Accessible at any time and for many of us from our mobile phones, the Internet has opened up a world of knowledge and communication platforms that we

cannot now imagine living without This book explores the concept that the Internet has become a second action space for individuals Coexisting with traditional and obvious real space the Internet serves as a novel spatial platform and action space to its subscribers all over the world Kellerman expertly discusses this notion and examines the practical integration of cyberspace with real space Part I examines the Internet as a platform for action and presents its relations with physical space concerning a range of uses and applications which were traditionally performed in physical space only It discusses the idea that the Internet has become a second space and explores theoretical perspectives surrounding this notion The Internet has undeniably made humankind more efficient and connected Part II explores the Internet as an action space for human life considering basic human needs curiosity identity and social relations It further considers instances whereby use and application of the Internet cannot be fully performed in real space mainly regarding people s presentation of identity Part III explores daily actions over the Internet such as work shopping banking and social interactions Kellerman also briefly touches on the darker aspects that the expansion of the Internet has made possible including its role in fraud and other crimes The concluding chapter discusses people living across the two spaces and identifies potential future developments The Internet as Second Actions Space will appeal to students across the social sciences in particular those studying Geography Sociology Media Studies Internet Studies Business and related disciplines

The War Lawyers Craig Jones,2020-11-26 Over the last 20 years the world s most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

**The One-Way Street of Integration** Edward G. Goetz,2018-03-15 The One Way Street of Integration examines two contrasting housing policy approaches to achieving racial justice Integration initiatives and community development efforts have been for decades contrasting means of achieving racial equity through housing policy Goetz traces the tensions involved in housing integration and policy to show why he doesn t see the solution to racial injustice as the government moving poor and nonwhite people out of their communities The One Way Street of Integration critiques fair housing integration policies for targeting settlement patterns while ignoring underlying racism and issues of economic and political power Goetz

challenges liberal orthodoxy determining that the standard efforts toward integration are unlikely to lead to racial equity or racial justice in American cities In fact in this pursuit it is the community development movement rather that has the greatest potential for connecting to social change and social justice efforts *Advances in Biographical Methods* Maggie

O'Neill, Brian Roberts, Andrew Sparkes, 2014-12-05 Rooted in a long and diverse genealogy biographical approaches have developed from a focus upon a single story a life story and personal documents e g diaries to encompass more routinely autobiographical secondary and archival research and analysis as well as multi media arts based creative multi sensory methods Biographical Research and practices as part of human understanding helps people to make sense of what has been and what is happening in their lives cultures communities and societies *Advances in Biographical Methods Creative Applications* takes up these themes theorising doing and applying current advances in biographical methods It demonstrates the momentum with which they areas are developing as a field of scholarship especially in relation to creative innovations and applications such as in new forms of interview and other practices and debates on its interlinking with art performance and digital methods *The World-Literary System and the Atlantic* Sorcha Gunne, Neil Lazarus, 2020-12-30 The World

Literary System and the Atlantic grapples with key questions about how American studies and the Atlantic region in general engages with new considerations of literary comparativism international literary space and the world literary system The edited collection furthers these discussions by placing them into a relationship with the theory of combined and uneven development a theory that has a long pedigree in Marxist sociology and political economy and that continues to stimulate debate across the social sciences but whose implications for culture have received less attention Drawing on the comparative modes concepts and methods being developed in the new world literary studies the essays cover a diverse range of topics such as the periodization of world literature racism and the world system singular modernity critical realism commodity frontiers semi peripherality and world ecology The chapters in this book were originally published in the journal *Atlantic Studies*

*Locating Value* Samantha Saville, Gareth Hoskins, 2019-11-21 This book considers the concept of value at the root of our actions and decision making Value is an ever present yet little interrogated aspect of everyday life This book explores value as it is theorised practiced and critiqued from a variety of disciplinary perspectives It examines how value is operationalized endorsed and contested in contemporary society With international insights from leading scholars chapters offer a diverse and vibrant geographical engagement with value to showcase its conceptual flexibility The book explores value s eclectic epistemic foundations it s roll out and legitimation across a range of policy fields and its challenges and opportunities The book draws on global examples of value in practice from forest conservation in Indonesia protected area management in arctic Norway a state park in the US certification schemes for biodiversity in the UK protection of the international night sky heritage planning in East Taiwan a re developed airport site in Norway a local food networks in Canada and the UK a market in the US and urban development in China The book will be of interest to human geographers

political ecologists heritage scholars and practitioners planners and those working in public policy as well as practitioners and policy makers interested in how valuation processes work      **Chinese Migrants and Africa's Development** Doctor Ben Lampert, Doctor May Tan-Mullins, Daphne Chang, Giles Mohan, 2014-06-12 China's recent stepping up of relations with Africa is one of the most significant developments on the African continent for decades For some it promises an end to Africa's dependent aid relationships as the Chinese bring expertise technology and a stronger business focus But for others it is no more than a new form of imperialism This book is the first to systematically study the motivations relationships and impact of this migration It focuses not just on the Chinese migrants but also on the perceptions of and linkages to their African hosts By studying this everyday interaction we get a much richer picture of whether this is South South cooperation as political leaders would have us believe or a more complex relationship that can both compromise and encourage African development
