The Global Factory Peter J. Buckley, 2018-02-23 This key new book synthesises Peter Buckley's work on the global factory the modern networked multinational enterprise The role of interfirm networks entrepreneurship and cooperation in the creation and management of global factories leads to a discussion of their governance internal knowledge transfer strategies and performance including their role in potentially combating societal failures Emerging country multinationals are examined as a special case of global factories with a focus on Indian and Chinese multinationals their involvement in tax havens and offshore financial centres the performance and processes of their acquisition strategies all seen as key aspects of globalisation

Geographers Hayden Lorimer, Charles W. J. Withers, 2015-10-29 Volume 34 of Geographers Biobibliographical Studies features eight essays that together demonstrate geographers' diverse scholarly engagement with the practice of their subject There are two physical geographers a Frenchman and an Englishman both geomorphologists a British historical geographer a French colonial geographer a Russian explorer naturalist of Central Asia and Tibet a British born but long time Australian resident and scholar of India Pakistan and the Pacific world an American regionalist and eugenicist and a Scots born long time American resident one of the world's leading Marxist geographers and urban theorists Equally but differently committed to geography's many specialisms these subjects wonderfully illuminate the vibrancy and the contradictions behind the living of geographical lives

The Coming of Neo-Feudalism Joel Kotkin, 2023-01-10 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them

Infinite Suburbia MIT Norman B. Leventhal Center for Advanced Urbanism, 2018-03-13 Infinite Suburbia is the culmination of the MIT Norman B Leventhal Center for Advanced Urbanism's yearlong study of the future of suburban development Extensive research an exhibition and a conference at MIT's Media Lab this groundbreaking collection presents fifty two essays by seventy four authors from twenty different fields

including but not limited to design architecture landscape planning history demographics social justice familial trends policy energy mobility health environment economics and applied and future technologies This exhaustive compilation is richly illustrated with a wealth of photography aerial drone shots drawings plans diagrams charts maps and archival materials making it the definitive statement on suburbia at the beginning of the twenty first century *Transnational Religious Spaces*

O. Sheringham, 2013-04-16 This book explores the role of religion in the lives of Brazilian migrants in London and on their return back home Working with the notion of religion as lived experience it moves beyond rigid denominational boundaries and examines how and where religion is practiced in migrants everyday lives **Russia's Changing Economic and**

Political Regimes Andrey Makarychev, Andre Mommen, 2013-07-18 The book reveals the interconnection between social cultural and political protest movements and social and economic changes in a post communist country like Russia still dominated by bureaucratic rulers and oligarchs controlling all basic industries and mining activities Those interests are also dominating Russia s foreign policy and explain why Russia did not succeed in becoming an integral part of Europe The latter is at least wished by many Russian citizens Indian Muslims Riaz Hassan, 2016-10-17 Research shows that Indian Muslims experience higher levels of development and equity deficits Indian Muslims are also predicted to become the largest Muslim population in the world by 2050 This increase in numbers might exacerbate their relative deprivation creating a disjunction between India s constitutional promises of equality of opportunity for citizens of a secular democracy including for minorities and the existential reality This will create social and political conditions that could undermine the stability of the country s democracy and make Indian Muslims a security threat which would have not only national but also global ramifications This book examines the struggle for equality of citizenship of Indian Muslims in light of the release of the Sachar Committee report of 2006 which sparked widespread awareness of socioeconomic disparity and exclusion of religious minorities in India especially Muslims The contributors are some of the most eminent social scientists in the fields of applied economics politics sociology and demography who work on Indian issues The Indian state and its political infrastructure have been relatively successful thus far in countering the challenges presented by the diversity of its population India therefore has the capacity and the ability to deal with these new challenges given the political and collective will *Islamic Studies Series Volume 22*

War, Identity and the Liberal State Victoria Basham, 2013-07-24 This book critically examines the significance of gender race and sexuality to wars waged by liberal states Drawing on original field research with British soldiers it offers insights into how their everyday experiences are shaped by and shape a politics of gender race and sexuality that not only underpins power relations in the military but the geopolitics of wars waged by liberal states Linking the politics of daily life to the international is an intervention into international relations IR and security studies because instead of overlooking the politics of the everyday this book insists that it is vital to explore how geopolitical events and practices are co constituted reinforced and contested by it By utilising insights from Michel Foucault the book explores how shared and collectively mediated

knowledge on gender race and sexuality facilitates certain claims about the nature of governing in liberal states and about why and how such states wage war against illiberal ones in pursuit of global peace and security The book also develops post structural work in international relations by urging scholars interested in the linguistic construction of geopolitics to consider the ways in which bodies objects and architectures also reinforce particular ideas about war identity and statehood

Tourism, Poverty and Development Andrew Holden, 2013-07-18 Poverty alleviation is high on the global policy agenda its importance being emphasised by its place as the first of the United Nations Millennium Development Goals As a potentially significant source of economic growth in developing countries tourism may also play a major role in poverty reduction and alleviation under the right circumstances The incorporation of tourism into development policy and Poverty Reduction Strategies has special poignancy for those Least Developed Countries where natural resources exist to support a tourism industry and there are limited development alternatives This book offers a holistic explicit and detailed introduction to the relationship of poverty and tourism within the context of developing countries The book is divided into distinct sections progressing from an evaluation of the key concepts of poverty tourism and development to the causal factors of poverty to the mechanisms of how tourism is being implemented in policy and practice to reduce poverty and finally to an analysis of the relationship between tourism to poverty alleviation in the future The adopted analytical approach of the key themes is multi disciplinary incorporating tourism studies human geography political economy economics development and environmental studies It integrates examples and original case studies from varying geographical developing regions including Africa South Asian and East Asia and the Pacific to lend practical insights into tourism's role in poverty alleviation The text will be of particular interest to higher education students from tourism studies geography political economy environmental and development studies and sociology backgrounds It will also be of relevance to government and policy makers alongside those who have a more general interest in poverty alleviation

Climate Change and European Security Richard Youngs, 2014-10-10 It is now commonly asserted that climate change will fundamentally change international relations It has been predicted that global warming will increase conflict within and between states intensify food insecurity menace the global trading system and unleash waves of migration As a result governments are beginning to incorporate these warnings into their foreign policy initiatives The appropriateness of their incipient responses needs to be examined in finer detail This book looks at the impact of climate change on European Union EU security policy It explores how governments are reconfiguring their geo strategy and broader international relations in the wake of climate change warnings The book demonstrates that although many aspects of EU foreign policies have begun to change climate security is not yet accorded unequivocal or sufficient priority In doing so Youngs argues that if climate change policies are to have significant effect they can no longer be treated as a separate area of policy but must be incorporated into the more mainstream debates pertinent to EU common foreign and security policy CFSP This book will be of key interest to students

scholars and practitioners of climate change and policy energy and environmental policy EU governance and foreign policy European studies international relations geography security studies policy and environmental economics China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the most significant factors for contemporary international relations is the growth of China's economic military and political power. Indeed, few analysts would dispute the observation that China's power has strongly influenced the structure of the international system, major power strategic relations, international security, the patterns of trans-border economic activities, and most importantly, the political and security dynamics in Asia in the twenty-first century. This book maps the growth of China's political, economic, and military capabilities and its impact on the security order in Asia over the coming decades. While updating the emerging power dimensions and prevailing discourse, it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive or even aggressive in its behavior and pursuit of national interests. It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political, economic, and military power. China's Power and Asian Security will be of huge interest to students and scholars of Asian politics, Chinese politics, security studies, and international security and international relations more generally.

The Economics of Creativity Thierry Burger-Helmchen, 2013 Understanding the economic implication of creative individuals and firms is at the heart of the new economy and of related fields such as the economics of knowledge, the economics of science, and innovation management. This book brings together a panel of theoretical and empirical contributions which address the generation of creative ideas and their transformation into products and services by firms or universities, as well as the interplay of those organizations in networks and markets. The word creativity has been used a great deal recently in relation to efforts to recover from the global financial crisis and relaunch economic activity. Little has been added to explain how and why an economic approach of creativity is useful and necessary. It is useful to understand how the most creative people work and think and how to foster their creative productivity. It is useful to understand how organizations integrate and exploit creative ideas. It is useful to understand how market mechanisms can handle creativity and how policies must be adapted. It is necessary in the light of the recent economic crises that made innovation, invention, and creativity the basis of a new industrialization and fuel for a new economic development. This new book assesses the economic impact of creativity, defining the term and then going on to explore theoretically and practically the economic consequences of creativity through a range of themes including creativity and evolutionary theories of technological change, creativity and organizational learning, creativity and technological policy, and creativity and economics of networks. This volume offers a rich source of inspiration and ideas for the pursuit of research which merges economic tradition and management perspectives.
