Learn the Secret to Success on the Regents Exam. After nearly 20 years of teaching, Lewis Morris discovered a startling fact: Most students didn't struggle with the subject; they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject, there was a list of essential words that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the Insider's Words. When he applied these Insider's Words, the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of books and applications to teach this Insider's Language to students around the world. Our books and applications are helpful to any student. They are especially helpful to struggling students, English language learners, and students beginning a course of study. The strongest students will also enjoy the puzzle and game aspect of the books. In all cases, the books provide an enjoyable break from the tedious and mundane experience of traditional test preparation. Get your copy today.

L. Davis, 2005-08-01 The chapters in this volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and low level rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987 previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and high stakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational experiences

**History Lessons** S.G. Grant, 2014-04-04 In this book extended case studies of two veteran teachers and their students are combined with the extant research literature to explore current issues of teaching learning and testing U S history It is among the first to examine these issues together and in interaction While the two teachers share several similarities the teaching practices they construct could not be more different To explore these differences the author asks what their teaching practices look like how their instruction influences their students understandings of history and what role statewide exams play in their classroom decisions *History Lessons Teaching Learning and Testing in U S High School Classrooms* is a major contribution to the emerging body of empirical research in the field of social studies education chiefly in the subject area of history which asks how U S students make sense of history and how teachers construct their classroom practices Three case study chapters are paired with three essay review chapters intended to help readers analyze the cases by looking at them in the context of the current research literature Two concluding chapters extend the cases and analyses the first looks at how and why the teachers profiled in this book construct their individual teaching practices in terms of three distinct but interacting sets of influences personal organizational and policy factors the second explores the prospects for promoting what the author defines as ambitious teaching and learning Many policymakers assume that standards based reforms support the efforts of ambitious teachers but until we better understand how they and the students in their classes think and act that assumption is hollow at best This book is a must have for faculty and students in the field of social studies education and broadly relevant across the fields of curriculum studies and educational policy **Discipline Problems** Tadashi Dozono, 2024-05-07 Angel a Black tenth grader at a New York City public school self identifies as a nerd and likes to learn But she is troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas presenting a sugar coated image of the United States that is at odds with her everyday experience The history I

learned in school is simpler she says The world I live in is a lot more complex Angel like every student interviewed in Discipline Problems has been identified by teachers as a troublemaker a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she s taught speak to her curiosity and insight crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools she exposes the shortcomings of her classrooms academic environments by challenging both the content and the methods of her education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners
