Making College Work Harry J. Holzer, Sandy Baum, 2017-08-15 Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying The authors provide a new review of the causes of these problems and offer promising policy solutions The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students Some solutions including better financial aid or academic supports target individual students Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process While no single policy is guaranteed to greatly improve college and career outcomes implementing a number of evidence based policies and programs together has the potential to improve these outcomes substantially

Disaster and Climate Risk Education Ayse Yildiz, Rajib Shaw, 2024-09-30 Education serves as a cornerstone for gaining knowledge and taking initiative However despite efforts in disaster and climate risk education DCRE a gap often exists between awareness and meaningful action To bridge this gap and promote a progression from awareness to empowerment we offer the KIDA Knowledge Interest Desire Action framework The foundation of this framework is a collaboration between schools communities and families which calls for

support from educational boards and local governments Following international tragedies like the Turkey Syria earthquake of 2023 as well as the ever changing difficulties posed by climate change DCRE has to be given priority immediately Our book proposes a comprehensive strategy that includes governance capacity building education in schools and the community and technology integration Our insights analyses and practical policy suggestions are based on multidisciplinary research and worldwide case studies with the goal of strengthening resilience and cultivating a generation committed to sustainability This book provides a comprehensive exploration of DCRE It aims to prepare individuals and communities to face the challenges of a changing world head on by improving knowledge and promoting preparedness

Environmental Education in Indonesia Lyn Parker, Kelsie Prabawa-Sear, 2019-08-08 Indonesia's wealth of natural resources is being exploited at breakneck speed and environmental awareness and knowledge among the populace is limited This book examines how young people learn about the environment to see how education can help to develop environmental awareness and avert vast environmental destruction not only in Indonesia but also in the Global South more generally Based on in depth studies conducted in the cities of Yogyakarta and Surabaya complemented with surveys of students in secondary schools Environmental Education in Indonesia examines educational curricula pedagogy and green activities to reveal what is currently being done in schools to educate children about the environment The book investigates the shortcomings in environment education including underqualified teachers the civil service mentality the still pervasive chalk and talk pedagogy and the effect of the examination system It also analyses the role of local government in supporting or not environmental education and the contribution of environmental NGOs The book establishes that young people are not currently being exposed to effective environmental education and the authors propose that the best and most culturally appropriate way forward in Indonesia is to frame pro environment behaviour and responsibility as a form of citizenship and specifically that environmental education should be taught as a separate subject This book will be of great interest to students and scholars of contemporary Indonesia and Southeast Asia education for sustainability and environmental education as well as sustainability and sustainable development more generally

Finnish Lessons 2.0 Pasi Sahlberg, 2014-02-01 Pasi Sahlberg has thoroughly updated his groundbreaking account of how Finland built a world class education system during the past four decades In this international bestseller Sahlberg traces the evolution of Finnish education policies and highlights how they differ from the United States and much of the rest of the world Featuring substantial additions throughout the text Finnish Lessons 2.0 demonstrates how systematically focusing on teacher and leader professionalism building trust between the society and its schools and investing in educational equity rather than competition choice and other market based reforms make Finnish schools an international model of success This second edition details the complexity of meaningful change by examining Finland's educational performance in light of the most recent international assessment data and domestic changes
