New Lines Matthew W. Wilson, 2017-11-15 New Lines takes the pulse of a society increasingly drawn to the power of the digital map examining the conceptual and technical developments of the field of geographic information science as this work is refracted through a pervasive digital culture Matthew W Wilson draws together archival research on the birth of the digital map with a reconsideration of the critical turn in mapping and cartographic thought Seeking to bridge a foundational divide within the discipline of geography between cultural and human geographers and practitioners of Geographic Information Systems GIS Wilson suggests that GIS practitioners may operate within a critical vacuum and may not fully contend with their placement within broader networks the politics of mapping the rise of the digital humanities the activist possibilities of appropriating GIS technologies and more Employing the concept of the drawn and traced line Wilson treads the theoretical terrain of Deleuze Guattari and Gunnar Olsson while grounding their thoughts with the hybrid impulse of the more than human thought of Donna Haraway What results is a series of interventions fractures

in the lines directing everyday life that provide the reader with an opportunity to consider the renewed urgency of forceful geographic representation These five fractures are criticality digitality movement attention and quantification New Lines examines their traces to find their potential and their necessity in the face of our frenetic digital life A Primer of GIS, Second Edition Francis Harvey, 2015-10-29 This accessible text prepares students to understand and work with geographic information systems GIS offering a detailed introduction to essential theories concepts and skills The book is organized in four modular parts that can be used in any sequence in entry level and more specialized courses Basic cartographic principles are integrated with up to date discussions of GIS technologies and applications Coverage includes everything from what geographic information is to its many uses and societal implications Practical examples and exercises invite readers to explore the choices involved in producing reliable maps and other forms of geographic information Illustrations include 170 figures with 15 in color The companion website provides links to Web resources for each chapter plus downloadable PowerPoint slides of most of the figures New to This Edition Chapter on online mapping and Big Data New and updated discussions of remote sensing vector and raster data models location privacy uses of geocoding and other timely topics Chapter on the many uses of GIS such as in market analyses emergency responding and tracking of epidemics Section overviews and an end of book glossary Pedagogical Features Modules and individual chapters can be used sequentially or in any order End of chapter review questions with answers exercises and extended exercises for applying theories and concepts In Depth sidebars offering a closer look at key concepts and applications End of chapter links to relevant Web resources

Teaching Geography 3-11 David Owen, Alison Ryan, 2001-10-23 place above teaching history

Knowledge and the Future School Michael Young, David Lambert, Carolyn Roberts, Martin Roberts, 2014-10-10 Written at a time of uncertainty about the implications of the English government's curriculum policies Knowledge and the Future School engages with the debate between the government and large sections of the educational community It provides a forward looking framework for head teachers their staff and those involved in training teachers to use when developing the curriculum of individual schools in the context of a national curriculum While explaining recent ideas in the sociology of educational knowledge the authors draw on Michael Young's earlier research with Johan Muller to distinguish three models of the curriculum in terms of their assumptions about knowledge referred to in this book as Future 1 Future 2 and Future 3 They link Future 3 to the idea of powerful knowledge for all pupils as a curriculum principle for any school arguing that the question of knowledge is intimately linked to the issue of social justice and that access to powerful knowledge is a necessary component of the

education of all pupils Knowledge and the Future School offers a new way of thinking about the problems that head teachers their staff and curriculum designers face In charting a course for schools that goes beyond current debates it also provides a perspective that policy makers should not avoid
