The Knowledge Gap Natalie Wexler,2019-08-06 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America's education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education The problem wasn't one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars* Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention

**Commodification of Global Agrifood Systems and Agro-Ecology** Yıldız Atasoy,2017-05-18 This book explores the shifting relations of food provisioning in Turkey

from a comparative global political economy perspective. It offers in depth ethnographic analysis, interviews and historical insights into the ambiguities and diversities that simultaneously affect the changing conditions of food and agriculture in Turkey. Specific issues examined include the commodification of land, food and labour, the expansion and deepening of industrial standardization, the expansion of a supermarket model and concomitant changes in as well as the simultaneous co-existence of traditional methods of production and marketing. Contrasting observations are drawn from diverse locales to provide examples of convergence, divergence and cohabitation in relation to transnationally advocated industrial models.

**Commodification of Global Agrifood Systems and Agro Ecology** employs a form of comparative perspective that allows the particular processes of restructuring of agrifood relations in Turkey to be simultaneously distinguished from yet related to changes taking place in global power dynamics. Y. İ. Atasoy explores agrifood transformation in Turkey with a unique approach that considers a plurality of intertwined normative influences: ontological beliefs, cultural, religious, narratives, political struggles and critical interpretive positions. Based on original research, the book treats changes in food provisioning as an analytical thread capable of uncovering how the normative acceptability of capitalized agriculture and techno-scientific innovation is entangled with processes of class formation, growing inter-capitalist competition and Islamic politics. Such processes in turn frame income, wealth, generation, landscape, management, agro-ecological dynamics and labour practices, as well as the taste and smell of place.

**The Perfect Dictatorship** Stein Ringen, 2016-05-01. The Chinese system is like no other known to man now or in history. This book explains how the system works and where it may be moving. Drawing on Chinese and international sources, on extensive collaboration with Chinese scholars and on the political science of state analysis, the author concludes that under the new leadership of Xi Jinping, the system of government has been transformed into a new regime, radically harder and more ideological than the legacy of Deng Xiaoping. China is less strong economically and more dictatorial politically than the world has wanted to believe. By analysing the leadership of Xi Jinping, the meaning of socialist market economy, corruption, the party-state apparatus, the reach of the party, the mechanisms of repression, taxation and public services and state-society relations, the book broadens the field of China studies as well as the fields of political economy, comparative politics, development and welfare state studies. A new interpretation of the Chinese party-state shows the advantage that derives from a comparative theorist looking at the Chinese system.

Tony Saich, Harvard University. This is an excellent book which asks important questions about China's future. In a lively and persuasive manner, the author vividly analyses key data in a comparative and theoretical manner. Far and away, the best introduction to how the CCP dictatorship works.

Edward Friedman, University of Wisconsin-Madison. There is no lack of scholars and pundits abroad who tell us that dictatorship in China is for the greater good. In a timely and engagingly written book, Stein Ringen systematically demolishes all the components of this claim.

Frank Dikötter, University of Hong Kong. Stein Ringen shows how the Chinese state has used both fear and material inducements to build a controlocracy of a size and complexity unprecedented in world history. Perfect
