Sino-Japanese War and Youth Literature Minjie Chen,2016-01-22 The Sino Japanese War 1937 1945 was fought in the Asia Pacific theatre between Imperial Japan and China with the United States as the latter s major military ally An important line of investigation remains questioning how the history of this war has been passed on to post war generations consciousness and how information sources particularly those exposed to young people in their formative years shape their knowledge and bias of the conflict as well as World War II more generally This book is the first to focus on how the Sino

Japanese War has been represented in non English and English sources for children and young adults As a cross cultural study and an interdisciplinary endeavour it not only examines youth orientated publications in China and the United States but also draws upon popular culture novelists memoirs and family oral narratives to make comparisons between fiction and history Chinese and American sources and published materials and private memories of the war Through quantitative narrative analysis literary and visual analysis and socio political critique it shows the dominant pattern of war stories traces chronological changes over the seven decades from 1937 to 2007 and teases out the ways in which the history of the Sino Japanese War has been constructed censored and utilized to serve shifting agendas Providing a much needed examination of public memory literary representation and popular imagination of the Sino Japanese War this book will have huge interdisciplinary appeal particularly for students and scholars of Asian history literature society and education Gender and Political Violence Candice D. Ortobals, Lori M. Poloni-Staudinger, 2018-03-09 This book examines the role of gender in political conflicts worldwide specifically the intersection between gender and terrorism Political violence has historically been viewed as a male domain with men considered the perpetrators of violence and power and women as victims without power Whereas men and masculinity are associated with war and aggression women and femininity conjure up socially constructed images of passivity and peace This distinction of men as aggressors and women as passive victims denies women their voice and agency This book investigates how women cope with and influence violent politics and is both a descriptive and analytical attempt to describe in what ways women are present or absent in political contexts involving political violence and how they deal with gender assumptions express gender identities and frame their actions regarding political violence encountered in their lives The book looks to reach beyond the notion of women as victims of terrorism or genocide without agency and to recognize the gendered nature of political conflicts and how women respond to violence This book will be of interest to advanced undergraduate and graduate students in political science sociology cultural studies and gender studies academics in terrorism studies and gender studies government officials NGOs and professionals working in areas of violent conflict **Reading for Understanding** Ruth Schoenbach, Cynthia Greenleaf, Lynn Murphy, 2012-06-15 As elegantly practical as it is theoretically elegant It is a guided tour as one examines the tools of expert teachers as they engage students in a journey that is aptly dubbed Reading Apprenticeship learning how to become a savvy strategic reader under the tutelage of thoughtful caring and demanding teachers P David Pearson University of California Berkeley and founding editor of the Handbook of Reading Research Reading for Understanding is a monumental achievement It was a monumental achievement when it came out as a first edition in 1999 bringing years of rigorous reading research together in a framework for teaching that made sense in actual secondary school classrooms Now just thirteen years later Schoenbach and Greenleaf have several randomized clinical trials and multiple on going studies at their fingertips to demonstrate the effects of this approach for developing the reading and thinking of young people in our nation s middle and high school classrooms as well as in
