

**Document 2:** In 1992, Pope John Paul II signed an encyclical thought on behalf of the Catholic Church. Below are excerpts, a comprehensive physical reconstruction of various newspaper clippings and other reproduced copies of history's greatest scientist's.

My dear Giovanni, to clarify a matter, Pope John Paul II acknowledged in a speech today that the Roman Catholic Church had erred in condemning Galileo over 300 years ago. He admitted that the Church erred in regard to the Sun.

The address by the Pope before the Pontifical Academy of Sciences closed a 35 year investigation into the Church's condemnation of Galileo in which one of humanity's most important scientific revolutions (heliocentrism) was examined. Galileo was forced to accept the Church's findings to avoid being burned at the stake and spent the remaining eight years of his life under house arrest.

John Paul said the theologians who condemned Galileo did not recognize the formal distinction between the Bible and its interpretation.

This led them unduly to transpose into the realm of the doctrine of the faith, questions which in fact pertained to scientific investigations.

Though the Pope acknowledged that the Church had done Galileo a wrong, he said the 17th-century theologians were working with the knowledge available to them at the time.

### Question 3:

Using Document 2, what was Pope John Paul II's main message according to this 1992 newspaper article? Pope John Paul II is trying to rectify the past wrongs of the Catholic Church in respect to Galileo's trial and condemnations. He states that Galileo was correct about heliocentrism and recognizes the error of the Catholic Church over 300 years earlier. He attempts to justify the actions of the Church based on the fact that theologians of the 1600s were "working with the knowledge available to them at the time."

**National Security, Public Health: Exceptions to Human Rights?** Myriam Feinberg, Laura Niada-Avshalom, Brigit Toebes, 2017-10-02 The book deals with the complicated relationships between national security and human rights and between public health and human rights Its premise is the fact that national security and public health are both included in human rights instruments as exceptions to the human rights therein sanctioned yet they can arguably be considered as human rights themselves and be equally valuable The book therefore asks to what extent the protection of the individual could or should be overridden to enable the protection of the national security or public health of the general public Both practice and case law have shown that human rights risk being set aside when they clash with the protection of national security or public health Through theoretical analysis and practical examples the book addresses the conflicts that arise when the concepts of national security and public health are used and abused and other rights including freedom of speech procedural freedoms individual health are violated as a consequence It provides many interesting findings on the values that states are ready to protect and forego to ensure their safety which can contribute to the ongoing debate on the protection of human rights This book was originally published as a special issue of The International Journal of Human Rights

Sustainable Entrepreneurship Adam Lindgreen, Christine Vallaster, François

Maon, Shumaila Yousafzai, Beatriz Palacios Florencio, 2016-04-30 The way organizations manage entrepreneurship has changed dramatically over the past decade. Today organizations take account of economic issues but they also adopt a broader perspective of their purpose including social and environmental issues i.e. sustainability. Yet despite its global spread sustainable entrepreneurship remains an uncertain and poorly defined ambition with few absolutes. This book reaffirms the important need to improve comprehension and explore the subtleties of how individuals, groups and organizations can discover, create and seize opportunities for blended value generation by designing and operating sustainable ventures. It examines in an interdisciplinary fashion and across sectoral and geographical boundaries how entrepreneurial activities can be developed to be generally consistent with sustainable development goals as well as by whom, for what reasons and with what implications. The Editors comprehensively review key dimensions of the sustainable entrepreneurship phenomenon to establish an essential definition and up to date picture of the field. The 19 chapters cover 4 main topics: Understanding the intentions and motivations for sustainable entrepreneurship; Fostering and enacting sustainability through entrepreneurial action; Leading and inspiring sustainable entrepreneurial action; Finding the contextually grounded implications of and challenges to sustainable entrepreneurship and blended value generation. This book is an important resource for entrepreneurs and policy makers as well as students in the fields of entrepreneurship, innovation and sustainability.

*Activism and the Fossil Fuel Industry* Andrew Cheon, Johannes Urpelainen, 2018-02-06 In less than a decade activism against the fossil fuel industry has exploded across the globe. While environmentalists used to focus on legislative goals such as carbon emissions trading or renewable energy policies, today the most prominent activists directly attack the fossil fuel industry. This timely book offers a comprehensive evaluation of different types of activism, the success and impact of campaigns and activities and suggestions as to ways forward. This book is the first systematic treatment of the anti fossil fuel movement in the United States. An accessible and readable text, it is an essential reference for scholars, policymakers, activists and citizens interested in climate change, fossil fuels and environmental sustainability. The entire book or chapters from it can be used as required or supplementary material in various courses at the undergraduate and graduate level. As the book is not technically challenging but contains a comprehensive review of climate change, fossil fuels and the literature on environmental activism, it can be used as an accessible introduction to the anti fossil fuel campaign across disciplines. The Green Economy in the Gulf Mohamed Abdel Raouf, Mari Luomi, 2015-07-30 Filling a void in academic and policy relevant literature on the topic of the green economy in the Arabian Gulf, this edited volume provides a multidisciplinary analysis of the key themes and challenges relating to the green economy in the region, including in the energy and water sectors and the urban environment as well as with respect to cross cutting issues such as labour, intellectual property and South-South cooperation. Over the course of the book, academics and practitioners from various fields demonstrate why transitioning into a green economy, a future economy based on environmental sustainability, social equity and improved well-being is not an

option but a necessity for the Gulf Cooperation Council GCC States Through chapters covering key economic sectors and cross cutting issues the book examines the GCC states quest to align their economies and economic development with the imperatives of environmental sustainability and social welfare and proposes a way forward based on lessons learned from experiences in the region and beyond This volume will be of great relevance to scholars and policy makers with an interest in environmental economics and policy
