Brave New Canada Derek H. Burney, Fen Osler Hampson, 2014-08-01 Globalization and the shifting tectonic plates of the international system have led to an increasingly competitive world If Canada hopes to gain advantage from the dramatic developments underway it will have to aggressively adapt its foreign and domestic policies and priorities under the clear direction of the federal government or accept being left behind In *Brave New Canada* Derek Burney and Fen Hampson identify the key trends that are reshaping the world s geopolitics and economics and discuss the challenges Canada confronts with the rise of China and other global centres of power Their examination of a wide range of themes including the place of

pluralistic democratic values in diplomacy economics and trade the ways that Canada should reset relations with its neighbour to the south as well as how to manage new global security threats paints a picture of how Canada can become bold assertive and confident and easily adjust to a new global landscape Arguing that a successful foreign policy cannot be crafted by looking at the world in the rear view mirror Brave New Canada offers evidence based provocative prescriptions for both the public and private sectors that should stimulate discussion and command widespread attention **Innovation, Science, Environment 07/08** Carleton University. School of Public Policy and Administration,2007 The impact of climate change is becoming increasingly obvious around the world but different levels of the Canadian government are failing to respond cohesively For example the Harper government immediately cut several liberal era environmental research programs and admitted that Canada has been moving away from Kyoto Protocol targets and that the Kyoto Protocol is not central to its idea of either good environmental or good energy policy Meanwhile a Quebec liberal government announced that it would introduce a carbon tax to reduce CO2 emissions by 10 million tons by 2012 while Canada s mayors introduced their own climate change initiatives linking them to local infrastructure development This second volume in the ISE series examines the reshaping of ISE policy in the context of multi level governance and policy Contributors examine climate change policy innovation in the natural resources sector the internet pharmacy trade biotechnology policy and governance provincial government renewable energy policies the psychological and human nature connection with sustainable development policies procurement policy and innovation the Canadian Institutes of Health Research and the commercialization of Canada s universities **The Truth about Canada** Mel Hurtig,2011-12-28 Renowned as a passionate Canadian bestselling author Mel Hurtig has combed through world statistics to see how Canada really measures up and the results are astonishing and often shocking This book is about how Canada has changed very much for the worse in the last twenty years As a result of these profound often hidden changes we are no longer the people we think we are To take one example the Canadian media usually leaves us with the impression that Canadians are really heavily taxed Yes compared to the U S A the usual point of comparison No compared to other countries with our standard of living other OECD countries for example there we come in 23rd on the high tax scale The shocks in this book build up chapter by chapter How do we rank in the world in voter turnout Try 109th Number of physicians per 100 000 population Try 54th Our rank in reducing pollution 126th out of 146 countries Some of the statistics are internal comparing Canada then and now They back up two of the book s most powerful themes the failure of Canadian big business to turn record profits into ongoing investment in our country and no coincidence the sellout of our assets at a rate that no other country would allow This statistics based book ranges across all areas of our lives including health wages productivity culture the media the most concentrated in the world and much else Mel Hurtig s message is that we can t do anything to fix the direction we re drifting in unless we recognize it and recognize The Truth About Canada **NewsCan** ,1996 [New Visions for Canadian Business](#) Alan M. Maintaining a Competitive Workforce Derek Hum,Wayne Simpson,Institute for Research on Public Policy,1996 Just how important is employer based training to Canada s competitive position globally How do we rank among other industrialized nations On what basis should we calculate the returns to education and training and how should the calculations be used in the development of government policy Canada has a delivery system of education that permits its citizens to acquire some of the best skills on earth But have we become too complacent Should we begin to recognize that employer based training rather than traditional education is appropriate The reader will appreciate that this is far from an academic debate There are likely to be federally initiated changes to the public funding of higher education during the next few years and this will have implications for the education and training right across the country This monograph will be required reading for anyone interested in Canada s competitive position the state of Canadian education and the readiness of Canadian workers for the economy of tomorrow
