backgrounds and perspectives and address the conference's two inter-related areas of focus: global antisemitism and the crisis of modernity currently affecting the core elements of Western society and civilization. Rather than treating antisemitism merely as an historical phenomenon, the authors place it squarely in the contemporary context. As a result, this volume also provides important insights into the ideologies, processes, and developments that give rise to prejudice in the contemporary global context. This thought-provoking collection will be of interest to students and scholars of antisemitism and discrimination as well as to scholars and readers from other fields.

Global Trade and Cultural Authentication Joanne B. Eicher, 2022-08 *Global Trade and Cultural Authentication* edited by Joanne Eicher showcases the complexity and enduring aesthetic and ingenuity of Kalabari artisans. The Kalabari people, most of whom make their homes in the eastern Niger Delta region of western Africa, are renowned for the artistry in working with globally imported textiles and dress for centuries. The 22 essays in this edited volume feature the work of leading Nigerian and American scholars and offer an in-depth, nuanced understanding of Kalabari textiles, aesthetics, and engagement with past and present global trade networks. Using dress and textiles as a lens, *Global Trade and Cultural Authentication* explores the Kalabari people's centuries-long role in the global trade arena. Their economic interconnectedness demonstrates that Africa was never a dark continent but rather critically involved in a global trade built around Kalabari resourcefulness and imagination.

Making the World Global Isaac A. Kamola, 2019-06-07 Following World War II, the American government and philanthropic foundations fundamentally remade American universities into sites for producing knowledge about the world as a collection of distinct nation-states. As neoliberal reforms took hold in the 1980s, visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions. Academics within these institutions reimagined the world instead as a single global market, and higher education as a commodity to be bought and sold. By the 1990s, American universities embraced this language of globalization, and globalization eventually became the organizing logic of higher education. In *Making the World Global*, Isaac A. Kamola examines how the relationships among universities, the American state, philanthropic organizations, and international financial institutions created the conditions that made it possible to imagine the world as global. Examining the Center for International Studies, Harvard Business School, the World Bank, the Social Science Research Council, and NYU, Kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced.

Social Justice Leadership for a Global World Cynthia Gerstl-Pepin, Judith A. Aiken, 2012-10-01 The global economic meltdown has highlighted the interconnectedness of nations. This book seeks to provide an overview of topics, issues, and best practices related to defining social justice leadership given our increasingly global world. Refugees and immigrants from around the globe now inhabit schools and institutions of higher education across the nation, and US students, teachers, and leaders are traversing international borders both physically and virtually through international collaboration.

technology and exchange programs Although there have been increased efforts and scholarship in support of diversity and multicultural awareness these efforts have largely focused on the US We acknowledge that many leadership theories are domestic in that they typically incorporate US perspectives or a single culture description of effective leadership This book provides a deeper understanding of diverse and multicultural perspectives as they relate to a world that is becoming increasingly interconnected economically socially and culturally Particular attention is paid to providing specific strategies for social justice leaders working in PK 12 and or higher education and leadership preparation programs to promote effective leadership that reflects multicultural understanding of the diversity both within and outside the US Within the context of leadership practice internationalization offers new insights and ideas about leadership aims processes and competencies as a means for addressing equity concerns throughout PK 20 education

The Writing Revolution Judith C. Hochman, Natalie Wexler, 2017-07-27 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution TWR provides a clear method of instruction that you can use no matter what subject or grade level you teach The model also known as The Hochman Method has demonstrated over and over that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback Insurmountable as the challenges faced by many students may seem The Writing Revolution can make a dramatic difference And the method does more than improve writing skills It also helps Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing There s no separate writing block and no separate writing curriculum Instead teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction But perhaps what s most revolutionary about the TWR method is that it takes the mystery out of learning to write well It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content
