Strategy, Policy, & Review Department, 2024-11-25 On November 15 2024 the IMF s Executive Board concluded the Review of the IMF s Transparency Policy and Open Archives Policy and approved a number of reforms As an international institution making important documents available to the public on timely basis enhances the IMF s credibility accountability and effectiveness and is critical to fulfill its mandate of promoting global economic and financial stability While transparency at the IMF is achieved through a range of policies and practices the Transparency Policy and the Open Archives Policy form the core elements of the IMF s transparency framework The Fund has come a long way since the inception of these policies in the early nineties Most

Board documents are now published more quickly and under more consistent and evenhanded application of modification rules. The information available in the Fund's archives has increased and is more easily accessible to the public. While experience suggests that these policies are effective in delivering on their objectives, the landscape in which the Fund operates has evolved since these policies were last reviewed in 2013. In a more interconnected and shock-prone world, the pace with which policymakers need to make decisions has accelerated and the expectations of stakeholders on the availability and timeliness of the Fund's analysis and policy advice has grown. Against this backdrop, the 2024 Review of the IMF's Transparency Policy and Open Archives Policy focuses on targeted reforms to: i) support faster publication of board documents and communications of Board's decisions; ii) strengthen the rules and processes to modify Board documents prior to publication; and iii) allow faster release of some documents in the Fund's archives accessible to the public. The reforms further clarify the scope and objectives of these policies, their implementation processes, and how to strengthen knowledge sharing. The review was supported by data analysis as well as surveys and consultations with key stakeholders including Executive Directors, country authorities, IMF missions, chiefs, and civil society organizations, as detailed in the three background papers accompanying this 2024 review.

Pollution Prevention Ryan Dupont, Kumar Ganesan, Louis Theodore, 2016-11-18. This new edition has been revised throughout and adds several sections including lean manufacturing and design for the environment, low impact development and green infrastructure, green science and engineering, and sustainability. It presents strategies to reduce waste from the source of materials development through to recycling and examines the basic concepts of the physical, chemical, and biological properties of different pollutants. It includes case studies from several industries such as pharmaceuticals, pesticides, metals, electronics, petrochemicals, refineries, and more. It also addresses the economic considerations for each pollution prevention approach.

Space Countermeasures and Medicine - Implementation into Earth medicine and Rehabilitation Elena S. Tomilovskaya, Nora Petersen, Jancy McPhee, Satoshi Iwase, Nandu Goswami, Steven Platts, 2023-09-08. The effects of microgravity on the human organism have been studied for over 60 years. The experience of short and long-term space flights revealed alterations in multiple physiological systems, either in the course of the flight or afterward. Some of these changes represent serious risks for crew health and functional capacity. This fact served as the trigger for multiple countries with space program participants to develop spaceflight countermeasures and medical support systems. These activities are intended to counteract space flight effects such as axial and support unloading, muscle disuse, monotony, fluid redistribution, sensory deficit, etc. Some countermeasures have been adapted from Earth medicine and sports, while others have been created especially for space flights. Many of the observed space flight effects have similarities to conditions seen on Earth, such as decrease of motor activity in aging people, immobilized patients, and professions associated with forced physical inactivity and isolation. Thus, many space countermeasures and medical support systems can be applied in Earth medicine and rehabilitation. For example,

countermeasures like loading suits lower body negative pressure suits electromyostimulation of various regimens water salt supplements vestibular training means etc have been used in Earth medicine and sports conditioning over the last 20 years
