

Reproduction Study Guide

Topics: Male and female reproductive anatomy and functions, menstrual cycle, fertilization, embryo development, asexual and sexual reproduction, mitosis, meiosis

Vocabulary:

Fertilization- process of sperm meeting the egg

Testes- Male reproductive organ that holds sperm and creates male hormones (testosterone)

Ovary- female reproductive organ that stores eggs and creates female hormones (estrogen + progesterone)

Estrogen- The female hormone produced in the ovaries that results in a change in the female appearance (Ex: breast development, body form change, body hair)

Testosterone- The male hormone produced in the testes that results in a change in the male appearance (Ex: deep voice, body hair, change in body form)

Uterus- Female organ that holds babies (shaped like an upside down pear)

Fallopian Tube- Female organ in which sperm and egg have to meet to create a Zygote.
(Located on each side of the uterus)

Sperm- the male sex cell that is found in the testes that are used for reproduction.

Egg- The female sex cell

Ovulation- The release of an egg during the menstrual cycle.

Menstrual cycle- An egg develops and is released from an ovary

Placenta - embryo's (baby) organ of respiration, nourishment, and excretion.

Fetus- an unborn offspring

Embryo- A more developed zygote

Development- When something changes over time (whether that shape, size, color, etc)

Differentiation- cells turn into specialized cells over time such as nerve and muscle cells.

Sexual reproduction- two cells from different parents unite to produce the first cell of the new organism (sperm + egg)

Asexual reproduction- Process by which a parent produces by itself (offspring is an EXACT copy)

Zygote- a cell formed by the union of two sex cells (ex: the result of fertilization) and is now capable of undergoing cell division to form a new individual.

Gamete- sex cells (Ex: sperm and egg)

Diploid- Cells having two sets of chromosomes.

Haploid- A cell containing only one set of chromosomes.

Mitosis- How body cells divide (identical, they create 2 daughter cells)

Meiosis- produces 4 genetically unique daughter cells (different) haploid cells (Ex: sex cells are formed)

Chromosomes- long DNA molecule with the genetic material of an organism

Grade 9 Science Reproduction Study Guide:

Science Curriculum Topic Study Page Keeley, 2005-02-23 Without question this book will be of great value to the profession of science teaching. Given today's educational landscape of standards and high stakes testing, curriculum topic study is an essential piece of the puzzle. Cary Sneider, Vice President for Educator Programs, Museum of Science, Boston. Discover the missing link between science standards, teacher practice, and improved student achievement. Becoming an accomplished science teacher not only requires a thorough understanding of science content but also a familiarity with science standards and research on student learning. However, a comprehensive strategy for translating standards and research into instructional practice has been lacking since the advent of standards-based education reform. *Science Curriculum Topic Study* provides a systematic professional development strategy that links science standards and research to curriculum instruction and assessment. Developed by author Page Keeley of the Maine Mathematics and Science Alliance, the Curriculum Topic Study CTS process can help teachers align curriculum instruction and assessment with specific research-based ideas and skills. The CTS process will help teachers improve their understanding of science content, clarify a hierarchy of content and skills in a learning goal from state or local standards, define formative and summative assessment goals and strategies, learn to recognize and address learning difficulties, increase opportunities for students of all backgrounds to achieve science literacy, design or utilize instructional materials effectively. Containing 147 separate curriculum topic study guides arranged in eleven categories that represent the major domains of science, this book provides the tools to both positively impact student learning and develop the knowledge and skills that distinguish expert science teachers from novices.

Life: The Science of Biology Study Guide William K. Purves, Edward Dzialowski, Lindsay Goodloe, Betty McGuire, Nancy Guild, Paula Mabee, 2003-12-26 New edition of a text presenting underlying concepts and showing their relevance to medical, agricultural, and environmental issues. Seven chapters discuss the cell, information, and heredity, evolutionary process, the evolution of diversity, the biology of flowering plants, and of animals and ecology and biogeography. Topics are linked by themes such as evolution, the experimental foundations of knowledge, the flow of energy in the living world, the application and influence of molecular techniques, and human health considerations. Includes a CD-ROM which covers some of the subject matter and introduces and illustrates 1,700 plus key terms and concepts. Resources for Teaching Middle School Science

Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material

includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents

Grade 9 Science Reproduction Study Guide Book Review: Unveiling the Magic of Language

In an electronic digital era where connections and knowledge reign supreme, the enchanting power of language has are more apparent than ever. Its capability to stir emotions, provoke thought, and instigate transformation is truly remarkable. This extraordinary book, aptly titled "**Grade 9 Science Reproduction Study Guide**," compiled by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound effect on our existence. Throughout this critique, we will delve in to the book is central themes, evaluate its unique writing style, and assess its overall influence on its readership.
