Economics Solved Papers YCT Expert Team, 2024-25 TGT PGT Economics Solved Papers **Productivity in Higher Education** Caroline M. Hoxby, Kevin Stange, 2020-01-10 How do the benefits of higher education compare with its costs and how does this comparison vary across individuals and institutions? These questions are fundamental to quantifying the productivity of the education sector. The studies in *Productivity in Higher Education* use rich and novel administrative data, modern econometric methods and careful institutional analysis to explore productivity issues. The authors examine the returns to undergraduate education, differences in costs by major, the productivity of for-profit schools, the productivity of various types of faculty and of outcomes, the effects of online education on the higher education market and the ways in which the productivity of different institutions responds to market forces. The analyses recognize five key challenges to assessing productivity in higher education: the potential for multiple student outcomes in terms of skills, earnings, invention and employment; the fact that colleges and universities are multiproduct firms that conduct varied activities across many domains; the fact that students select which school to attend based in part on their aptitude; the difficulty of attributing outcomes to individual institutions when students attend more than one; and the possibility that some of the benefits of higher education may arise from the system as a whole rather than from a single institution. The findings and the approaches illustrated can facilitate decision making processes in higher education. *PISA: Balancing School Choice and Equity: An International Perspective Based on Pisa* OECD, 2019-10-01 Many countries are struggling to reconcile greater flexibility in school choice with the need to ensure quality, equity and coherence in their school systems. This report provides an international perspective on issues related to school choice, especially how certain aspects of school choice policies may be associated with sorting students into different schools. *The SAGE Encyclopedia of Economics and Society* Frederick F.
