iQ Drive Split System Air Conditioner

The iQ Drive[™] air conditioner operates as part of a larger intercommunicating system which provides temperature, air flow, and humidity control for a residence or other similarly sized building. This system includes this outdoor unit, the dedicated iQ controller (thermostat), and an iQ system-compatible indoor unit, typically an air handler with electric strip heat or a gas furnace. The system will function only if these components are matched and intended for use within this system. A complete list of compatible equipment by model and serial number is available in NORDYNE document 709031, iQ Field Wiring Installation Instruction. Accessory equipment which may be used with this system includes humidifiers, electric or electronic air cleaners, and UV (ultraviolet) sterilizing lamps.

Refer to the System Operation section below for a complete description of how to use the various features of the system. In addition to providing the means for operation, the controller also serves as the means for initial system configuration and setup, and it provides a considerable amount of information for troubleshooting the system and diagnosing problems.
