Uncertainty, Modeling, and Decision Making in Geotechnics Kok-Kwang Phoon, Takayuki Shuku, Jianye Ching, 2023-12-11 Uncertainty Modeling and Decision Making in Geotechnics shows how uncertainty quantification and numerical modeling can complement each other to enhance decision making in geotechnical practice filling a critical gap in guiding practitioners to address uncertainties directly The book helps practitioners acquire a working knowledge of geotechnical risk and reliability methods and guides them to use these methods wisely in conjunction with data and numerical modeling In particular it provides guidance on the selection of realistic statistics and a cost effective accessible method to address different design objectives and for different problem settings and illustrates the value of this to decision making using realistic examples Bringing together statistical characterization reliability analysis reliability based design probabilistic inverse analysis and physical insights drawn from case studies this reference guide from an international team of experts offers an excellent resource for state of the practice uncertainty informed geotechnical design for specialist practitioners and the research community **Transforming Government and Public Services** Stephen

Jenner, 2016-02-24 This book distills the learning from practical experience and academic research and represents a significant contribution to the challenges we face in transforming government and public services in an environment of ever tighter finances John Suffolk UK Government Chief Information Officer Major public sector IT enabled business change programmes are designed to realize benefits in terms of more efficient services services tailored to the need of citizens and improved outcomes but in practice such benefits often fail to materialize or we are unable to demonstrate their delivery Transforming Government and Public Services provides proven tools techniques and processes to reverse this trend Stephen Jenner explores a number of key themes that are fundamental to an approach to project portfolio management built on value He explains how to develop a business case to achieve a desired intent rather than justify a particular solution create project documentation that is both technically rigorous and gives users a clear understanding of where you are going treat projects as investments rather than costs include stage gates with teeth that are closely linked to real performance plan for success rather than holding people to account for failure use a single version of the truth principle so there are no arguments about different data In a complex confusing and often highly politicized environment Stephen Jenner s Transforming Government and Public Services provides a clear definitive and highly applied guide for all involved in selecting the right projects and doing them right so that they achieve the intended investment objectives Sustainable Solvents James H Clark, Andrew Hunt, Corrado Topi, Giulia Paggiola, James Sherwood, 2017-05-10 Solvents are ubiquitous throughout the chemical industry and are found in many consumer products As a result interest in solvents and their environmental impact has been steadily

increasing. However, in order to achieve maximum integration of new green solvents into the relevant chemical sectors, clarification of the social, economic, and environmental implications of solvent substitution are needed. This book explores the solvent life cycle, highlighting the challenges faced at various points from production through the supply chain and downstream use to end-of-life treatment. It also discusses the potential benefits that a green chemistry and bio-based economy approach could bring. The current state of the art of green solvents is evaluated along these lines, in addition to reviewing their applications with an appreciation of sustainability criteria. Providing a critical assessment on emerging solvents and featuring case studies and perspectives from different sectors, this is an important reference for academics and industrialists working with solvents, as well as policy makers involved in bio-based initiatives.
