

Le paradoxe de Banach-Tarski

Le **paradoxe de Banach-Tarski** est un théorème démontré en 1924 par Stefan Banach et Alfred Tarski, qui affirme que l'on peut découper une boule en 6 morceaux et réassembler ces morceaux pour reconstituer deux boules identiques à la première.

Cela peut ressembler à la multiplication des pains mais ça n'a rien de magique, c'est Mathématique !
