Le Point Jean:

French Arms Exports Lucie Béraud-Sudreau, 2020-03-25 From De Gaulle onwards France's strategic independence has been predicated on self sufficiency in modern weapons To achieve and maintain the requisite defence industrial base in the context of limited domestic orders Paris sought to promote the export of its arms During the Cold War this underpinned but was also an expression of France's determination to resist bipolar domination France offered customers around the world an alternative to reliance on one superpower or the other and in doing so it generated the revenue to support an extensive domestic arms industry The end of the Cold War ushered in fundamental changes however Western defence spending shrank and the global market was turned upside down While France's arms export policy was less affected by human rights concerns than other democracies it was not immune to pressures stemming from the consolidation of Europe's defence industrial base and the increased interest of the EU in regulating the arms trade This Adelphi book considers how France has responded to changing political and market circumstances in the way that it promotes and controls the export of weapons It examines the rationale for considering a liberal arms export policy as essential to French independence and the institutional arrangements that underpinned this It tracks the dramatic changes in the global arms market since 1990 in terms of demand and market competition and charts the response of the French government to these changes The book underlines how the French machinery of government as a directing force behind the defence industry has been resistant to the notion of export restraint even in the case of sales to authoritarian regimes However it argues that France now faces a dilemma over whether to continue with a long successful course or to moderate its independence through greater collaboration to bolster European integration and better compete globally *Global Security Watch—The Maghreb* Yahia H. Zoubir, Louisa Dris-Aït-Hamadouche, 2013-04-23 An unprecedented analysis of how the liberation from colonial rule has threatened the Maghreb region of Africa and created political and social challenges that puts global security at risk Northwestern Africa known as the Maghreb consists of Algeria Libya Mauritania Morocco Tunisia and Western Sahara Recent changes in the political climate including the collapse of the Libyan regime in October 2011 and structural factors such as the decolonization of the countries within the Maghreb have escalated violence in the area exposing global powers including the United States to terrorist attacks This is the first book of its kind to focus on the strategic planning of the United States as well as other world powers in the stabilization of the region *Global Security Watch The Maghreb* Algeria Libya Morocco and Tunisia examines domestic regional and international policies as they relate to the area's culture geography and history Each of the book's seven chapters looks at the political and social stability of the land and features a discussion on such topics as interstate relations regional integration conflict resolution and the legislation governing security , Survival 59.6 The International Institute for Strategic Studies (IISS), 2023-04-21 *Survival* the bi-monthly publication from The International Institute for Strategic Studies is a leading forum for analysis and debate of international and strategic affairs With a diverse

Villon at Oxford ,2023-11-27 These proceedings of the colloquium held at Oxford in 1996 bear witness to the vitality of Villon studies across the world Leading scholars in the field came together to demonstrate the lively diversity of approach and range which characterizes the study of a man who has been described as the last great medieval and the first great modern poet As the sub title of the volume indicates emphasis is placed on the drama of the text and how Villon brought his work alive in ways which owe much to contemporary theatre and popular culture At the same time full recognition is given to his debt to the literary tradition of his day and the unique way he uses and manipulates it As a result all those interested in French poetry in the late medieval period will find the different papers essential reading for a better understanding of Villon himself and his place in the French poetic canon
