

Lesson Planning Guide

The following guide incorporates strategic planning and differentiated instruction to meet the needs of each and every learner. Lesson planning is a special skill that is learned in much the same way as other skills. It is one thing to surf the Net to retrieve lesson plans from other sites and adapt them to your needs. It is quite another thing to have the skill to develop your own lesson plans. When you are able to create your own lesson plans, it means you have taken a giant step toward "owning" the content you teach and the methods you use, and that is a good thing. Acquiring this skill is far more valuable than being able to use lesson plans developed by others. It takes thinking and practice to hone this skill, and it won't happen overnight, but it is a skill that will help to define you as a teacher. Knowing "how to" is far more important than knowing "about" when it comes to lesson plans, and is one of the important markers along the way to becoming a professional teacher.
