

Modifier 59 - Are You Using It Correctly?

What Is Modifier 59 Used For?

Typically, Modifier 59 indicates that more than one procedure is performed on the patient in a single visit. But such procedures should be on the different part of the bodies.

However, at times, it is used to bypass the edit system of the insurance carrier and avoid being bundled with another service on the same claim.

Going by the guidelines, it should never prevent a service from getting bundled with the other.

Modifier 59 is developed to indicate a physician's service on the patient during the same visit whereby the procedures are independent of each other. Such modifier helps in reporting the services usually performed together, but it can be done under certain circumstances, as deemed fit by the physician.
