Supporting Individuals Who Use Augmentative and Alternative Communication Eric J. Sanders, 2022-12-02

Individuals with complex communication needs who use Augmentative and Alternative Communication AAC frequently encounter barriers that limit their ability to achieve their full potential in communication and in life. These barriers include access barriers, limitations in the current capabilities of the AAC user or the communication systems that they use, as well as opportunity barriers, e.g., policy, practice, knowledge, skill, and attitude barriers that extend beyond the AAC user. It is essential to consider both access and opportunity barriers when designing systems and supports for individuals who use AAC. However, often the emphasis of research and practice is on addressing issues related to access barriers with far less attention to opportunity barriers.

Supporting Individuals Who Use Augmentative and Alternative Communication: Breaking Down Opportunity Barriers is the first book to focus specifically on practical strategies for breaking down opportunity barriers experienced by individuals who use AAC. The text is divided into four sections, with each section devoted to a frequently encountered opportunity barrier: knowledge, skill, practice, attitude, and policy. Within each section, readers will:

- a) develop a deeper understanding of the impact of the barrier through the eyes of individuals who use AAC or their families;
- b) acquire knowledge based on current research and recommended practices related to addressing the barrier; and
- c) learn how professionals have successfully addressed the barrier via case examples from the field.

The final chapter provides readers with information as well as tools and examples about how to go beyond the book and actively address the unique opportunity barriers they encounter.

Key Features:

- Includes in-depth interviews with individuals who use AAC and their families.
- Identifies evidence-based and promising practices for addressing opportunity barriers.
- Provides tips, tools, and resources for addressing opportunity barriers.
- Illustrates successful strategies for addressing opportunity barriers through case examples and step-by-step guidelines for implementation.
- Includes contributions from professionals in the field who have successfully addressed opportunity barriers in home, school, workplace, and community settings.

Who Should Read This Book: This book is designed to support those who find themselves frustrated by the opportunity barriers experienced by individuals who use AAC and are searching for ways to break down those barriers, including people who rely on AAC: speech language pathologists, special education teachers, occupational therapists, physical therapists, family members, university students, faculty in higher education, and other professionals in school, healthcare, and community settings.

Straight Talk about Psychological Testing for Kids Ellen Braaten, Gretchen Felopulos, 2003-11-26. Braaten and Felopulos describe how the evaluation process occurs in children, including the role, if any, that testing plays in diagnosing and devising treatment plans for dyslexia, ADHD, math and reading disorders, autism, and Asperger syndrome, depression, anxiety, and other conditions.
